Prof Cletos Mapiye is engaged as an Associate Professor in Meat Science at Stellenbosch University in South Africa. Since 2018, he has also been serving as the Chair for the South African Research Chairs Initiative in Meat Science. Cletos has previously worked in Canada, Rwanda, and Zimbabwe. His research explores the effects of nutrition and bioactive phytochemicals on production, shelf-life, eating quality, and health value of meat spanning the spectrum from commercial livestock production systems through small-scale to the complex subsistence systems. To date he has graduated over 20 postgraduate students and published 140 peer-reviewed journal articles. Cletos is a member of the South African Young Academy of Science, young affiliate of The World Academy of Science and C1 NRF rated scientist. Prof Mapiye serves as an associate editor for the Lipids journal, Frontiers in Animal Science, and South African Journal of Animal Sciences and Board member Meat and Muscle Biology journal. Cletos' impactful contributions to research, development, and capacity building to improve food security and reduce poverty in the developing world earned him the 2020 Young African Researchers Award and the 2017 Young Scientists' Prize in Agriculture and Food Security.
