

FACULTY OF SCIENCE, AGRICULTURE AND ENGINEERING

2025

POSTGRADUATE PROSPECTUS

Vision

A leading comprehensive African university that thrives on quality and fosters collaborative and innovative cultures with its rural and urban campuses.

Purpose Statement

We believe in educating and producing competitive, globally relevant, high-quality African scientists with future-focused competencies

Values

The FSAE embraces the UNIZULU values, which serve as a foundation for a more equitable and inclusive UNIZULU community. The values are:

- a) **Discovery** and pursuit of excellence through teaching, learning, research, and innovation in science
- b) Community of Belonging: We embrace all forms of diversity, social inclusion and elimination of social injustices.
- c) **Teamwork:** Working together to accomplish a common goal.
- d) Accountability: Subscribing to integrity and transparency.

CONTACT DETAILS

DEAN: PROF KC LEHLOENYA

INTRODUCTION AND OVERVIEW

The Faculty of Science, Agriculture and Engineering, herein called the Faculty, is one of four Faculties of the University of Zululand. It consists of Fourteen academic departments and a Science Access Department:

Agriculture Biochemistry and Microbiology Botany Chemistry Computer Science Consumer Sciences Engineering Geography and Environmental Studies Human Movement Science Hydrology Mathematical Sciences Nursing Science Physics Zoology Science Access

POSTGRADUATE QUALIFICATIONS

Students are advised that even though a module or programme may be included in this Handbook the Faculty is not compelled to offer it.

The **Rules** and **Departmental Entries** contain outlines of each qualification offered by the Faculty.

Honours Qualifications. The Honours Degree BSc (Hons) or B. Consumer Science (Hons) follows an acceptable first degree. It is a specialised programme of one-year duration for full time students.

Masters Qualifications. Following the BSc Hons Degree one may pursue a Master of Science Degree (MSc). This can be done by following either a research programme of at least one-year duration or, in some instances, by course work and research. In the former, examination is by dissertation while in the latter it is by coursework and dissertation, with coursework contributing a maximum of 50% of the total required credits. The duration of this qualification is a minimum of one year.

Doctoral Qualifications. The Degree of Doctor of Philosophy (PhD) in Science follows a MSc Degree. It is of at least a two-year duration and based on a programme of original research. Examination is by thesis. The duration of this qualification is a minimum of two years.

All the qualifications are accredited by the Council on Higher Education (CHE) and registered with the South African Qualifications Authority (SAQA).

MEANINGS OF TERMS USED

Module	Unit of study. Each such unit is given a code. The code
wodule	structure is as follows: Faculty indicator (S = Science and
	Agriculture).
First letter	
First letter	Department or discipline indicator (BOT = Botany, CHM =
	Chemistry, etc.).
Next three letters	Year-level (5, 7 or 8) Numeric to distinguish between
-	modules offered in the same year and semester
First number	(01, 02, 03, etc.). The numeric "00" is used to signify a
Second and third	research dissertation or thesis.
numbers	
Elective (module)	A module selected from a given list.
Prerequisite	A module which must be passed before registration of the
module	proposed module is allowed.
Co-requisite	A module which must be passed prior to or in the same
module	semester as the proposed module.
Prerequisite	A module which must be passed before the registration of a
_	module having the prerequisite.
Co-requisite	A module which must be passed before, or registered
-	together with, the module having the co-requisite.
Curriculum	The modules that comprise a qualification.
Programme	A structured curriculum leading to a qualification.
Assessment	The evaluation of a student's work in a module. This will
	include a combination of tests, seminars, assignments,
	projects, examinations (formal official evaluations) and other
	methods.
Continuous	The mark awarded to a student and arises from
Assessment Mark	assessments conducted within a module but excludes the
(CAM)	final summative examination. The syllabus for each module
	indicates how the CAM mark is calculated.
Notional study	The learning time required for a student of average ability to
hours	meet the outcomes for a module.
Credit points	One credit point is the value assigned to ten notional study
(credits)	hours of learning and assessment.
Senate	The Senate of the University of Zululand.
University	The University of Zululand.

PROCEDURE FOR EXTERNAL MODERATION/EXAMINATION

DEPARTMENTAL REVIEWS

Each department in the Faculty will be reviewed by an External Reviewer(s) on a periodic basis. The External Reviewer(s) will be academic staff member(s) from a similar department at another university who have a wide knowledge of the discipline offered by the department. External Reviewers will be appointed by the Faculty Board for a particular review. The minimum qualifications of reviewers will be a PhD in a field directly relevant to the department being reviewed; Reviewers who are or have been Heads of Department are preferred. The External Reviewer(s) will be expected to spend at least two days at the University and will assess the following aspects of Departmental activities:

- 1. Content of programmes offered.
- 2. Content of the modules offered.
- 3. Student study guides / work schedules.
- 4. Assessments: Standard, variety, mark allocation, applicability, fairness of marking, etc.
- 5. General academic administration of department.
- 6. Identification of weak and / or strong areas concerning the department.
- 7. Department productivity (Research and Community Service).
- 8. Departmental equipment and facilities.

The External Reviewer(s) will submit a written report to the Executive Dean of the Faculty with recommendations of how possible weak areas can be corrected. The Executive Dean will implement appropriate action in conjunction after the review in consultation with departmental staff members.

HONOURS QUALIFICATIONS

Honours examination papers and scripts and research reports are sent to the external examiners approved by the board of the faculty.

MASTER'S DISSERTATIONS AND DOCTORAL THESES

The supervisor/promoter must apply well in advance of a student completing, through the head of department, for the external examiner/s to be appointed by the board of the faculty. Once the student has completed the dissertation/thesis and the supervisor/ promoter is satisfied that it can be presented for examination the supervisor gives a letter to the student giving permission for submitting the form indicating intention to submit. The candidate shall at least three months prior to the intended submission of the manuscript for examination, and no later than 30 September of the year preceding the intended graduation ceremony, submit via the supervisor to the HoD a form indicating intention to submit the manuscript for examination together with a description (abstract) in English of the manuscript's contents not exceeding 500 words. The HoD shall in turn submit the form and abstract to the Dean. Finally, the dissertation/theses will be submitted through the dean to the examination office It is then the responsibility of the examinations officer to send out the dissertation/ thesis to the external examiners as was approved by the board of the faculty. The examination's officer receives the examiner's reports back and then approaches the Dean in order to call an examinations committee meeting. Under no circumstances may the examiner's report be made known to anybody before it has served before the examinations committee.

RECOGNITION OF PRIOR LEARNING

CONFERMENT OF EQUIVALENT STATUS

A student who attained a qualification from another institution and wish to register for a higher degree at the University of Zululand must apply for equivalent status for the former degree through the Student Affairs Section. This must be done well in advance, as it needs the recommendation of the Faculty Board as well as approval from the Senate. The University General Calendar gives the dates of these meetings. If a student registers provisionally the registration will be cancelled if the application for conferment of status is not approved.

RECOGNITION OF COURSES PASSED AT OTHER INSTITUTIONS

The onus to apply for recognition of courses passed elsewhere, to be used as credit for a degree at the University of Zululand, rests on the candidate. This is done through the Student Affairs Section. Heads of Departments at the University of Zululand will, on request, evaluate the relevant courses. The candidate must supply any information needed to evaluate each course e.g. the prospectus or course descriptions as published by the former institution. Only after the faculty board has approved the applications will they be entered on the students' record. If a course is not approved the student has to do the relevant modules at the University of Zululand.

STUDENT STUDY GUIDES / WORK SCHEDULES/ MODE OF DELIVERY

Every honours student will receive a student guide / work schedule for each module. This may be incorporated in a study guide or it may be distributed as a separate document.

This document will contain at least the following information:

- 1. Title and code of the module.
- 2. Brief description of the module.
- 3. The learning outcomes to be reached in the module.
- 4. Details of the lecturer / s who present the module.
- 5. All details of the study material for the module and where it is available.
- 6. A module time schedule, e.g. what work will be covered per week, when assessments take place or when work needs to be handed in, etc.
- 7. A description of the assessment methods and assessment criteria, the schedules for assessments and a breakdown of the composition of the final mark for the module.
- 8. How feedback of assessments is to be given to students.

The content may be delivered face –to – face using the traditional classroom structure or virtually using an on online platform. Students further need to have compatible devices in order to participate in all virtual learning platforms and activities.

FACULTY RULES FOR POSTGRADUATE DEGREES

The Faculty and Departmental Rules contained in this Handbook and the relevant General Academic Rules of the University are applicable to all students registered in the Faculty. Unless otherwise stated, any exceptions to these rules require the approval of the Faculty Board. In all instances, Departmental Rules may not relax the requirements stipulated in the Faculty Rules and Faculty Rules may not relax the requirements stipulated in the General Rules. Departmental Rules therefore replace Faculty Rules which in turn replace General Rules in instances where more stringent requirements are specified.

S1 HONOURS PROGRAMMES

S1.1 DISCIPLINES

The degree may be taken in the following disciplines:

BSc Applied Mathematics (honours) BSc Biochemistry (honours) BSc Biokinetics (honours) BSc Botany (honours) BSc Chemistry (honours) BSc Computer Science (honours) B. Consumer Sciences (honours) BSc Geography (honours) BSc Hydrology (honours) BSc Mathematics (honours) BSc Microbiology (honours) BSc Physics (honours) BSc Statistics (honours) BSc Zoology (honours)	4HON01 4HON02 4HON03 4HON03 4HON05 4HON06 4HON07 4HON08 4HON09 4HON10 4HON11 4HON14 4HON15
--	--

S1.2 ADMISSION TO THE DEGREE

- (a) All honours programmes offered by the Faculty of Science, Agriculture and Engineering at the start of the academic year. No admittance to the programme will be allowed at any other time.
- (b) To qualify for admission to a BSc honours degree programme a student shall possess a BSc undergraduate degree with a major in the subject she/he wishes to enrol for or have the approval of Senate for conferment of status equivalent to such a degree.
- (c) To qualify for admission to the B.Consumer Sciences honours degree programme a student shall possess a B.Consumer Sciences or a B Home Economics undergraduate degree, or have the approval of Senate for conferment of status equivalent to such a degree
- (d) To qualify for admission a to the BSc honours degree programme in Agriculture a student shall possess a four-year BSc degree which must be in a discipline of Agricultural Sciences appropriate to the selected curriculum, or have the approval of Senate for conferment of status equivalent to such a degree
- (e) To qualify for admission to the BSc Biokinetics honours degree programme a student shall possess a BSc, BA or equivalent degree in Human Movement

Science, or have the approval of Senate for conferment of status equivalent to such a degree

- (f) To be admitted to an Honours degree programme a student shall have passed the final-year modules of the major subject that leads to the honours degree with an average final mark of at least 60%.
- (g) If the average mark for the final-year modules of the major subject that leads to the honours degree is less than 60% then admission shall be subject to the approval of the Faculty Board. Before the end of January, applicants must submit to the Head of Department concerned, a full written motivation that details relevant work experience since the award of the bachelors' degree as well as any other information in support of their admittance to the degree. This motivation must be endorsed by the Head of Department before it serves at the Faculty Board.

S1.3 DURATION OF THE DEGREE

- (a) Full-time students may complete the degree in a minimum period of one year.
- (b) Students may complete the degree over a maximum period of two years.
- (c) The total duration of the degree shall not exceed one year beyond the minimum period.

S1.4 CURRICULUM

- (a) Unless specified to the contrary in the Departmental rules, the honours degree will consist of four semester-length 20 credit theory modules and one compulsory year-length 40 credit research module.
- (b) Compulsory modules and rules of combination for theory modules comprising honours degrees are outlined in departmental rules.
- (c) It may be possible for a student to replace one module offered by the department hosting the degree with a module from another department. Students must refer to departmental rules and consult with their Head of Department if they wish to do this. Registration for a module from outside of their department is contingent on the student satisfying the prerequisites for the module and on the approval of both Heads of department.
- (d) Students who do not have the necessary grounding in certain skills may be required to register for and pass specific undergraduate modules in addition to the prescribed curriculum.
- (e) All theory modules are offered subject to the availability of staff and resources required to offer the modules. Students must consult with the Head of Department to determine which modules will be offered in any year.

S1.5 ASSESSMENT

- (a) Each theory module comprises a continuous assessment component and a final examination.
- (b) The final mark for a theory module is derived from the mark for the continuous assessment and the mark for the final examination. The continuous assessment mark may not comprise more than 50% of the final mark.
- (c) A final mark of below 50% constitutes a fail.

- (d) The General Rules that relate to the classification of a module (distinction, merit) apply.
- (e) Each of the theory modules has a final examination of three-hours in length that is held immediately after the end of the semester in which it is taught.
- (f) The research project module is assessed through the examination of a final mini-dissertation/report that must be submitted by the end of semester two. The assessment may also include components such as an oral presentation of the research and seminar presentations as outlined in departmental rules.
- (g) No supplementary examinations are held for honours modules.

S1.6 CALCULATION OF THE FINAL MARK FOR THE DEGREE

- (a) The marks for each of the four theory modules will carry a weight equivalent to their credit value. In total the theory modules will form two-thirds ($\frac{2}{3}$) of the final mark. The mark for the research project will form one-third ($\frac{1}{3}$) of the final mark.
- (b) In order to obtain the degree, a student shall pass all of the theory modules and the research project, each with a final mark of at least 50%.
- (c) The General Rules that relate to the classification of a degree (distinction, merit) apply.
- (d) Modules that are failed may be repeated and passed within a period of one year after the module is first failed in order to retain credit for the passed modules. If the failed module(s) are not compulsory, then a substitute module(s) must be passed within a period of one year in order to retain credit for the passed modules. If after the period of one year, all components have not been passed then the honours programme must be repeated in its entirety.
- (e) Substitute modules referred to in S25(d) must be honours level modules and the Head of Department must approve the substitution. If a substitute is selected from another department then the substitution must also be approved by the Head of the Department that offers the module.

S1.7 ATTAINMENT AND CONFERMENT OF DEGREE

- (a) The qualification must be completed in no more than one year beyond the minimum prescribed time for that qualification. Only years that have been registered are used in determining the number of years taken by a student.
- (b) Students who have satisfied all of the academic requirements of a programme as outlined in these rules and in Departmental rules, will be deemed to have completed the degree.
- (c) The conferral of the degree at a graduation ceremony will only occur once all administrative and financial requirements have been met in addition to the academic requirements.

S2 MASTERS PROGRAMMES

S2.1 DISCIPLINES

The degree may be taken in the following disciplines:

M.Sc in Applied Mathematics	4MSC01
M.Sc in Biochemistry	4MSC02
M.Sc in Botany	4MSC03
M.Sc in Chemistry	4MSC04
M.Sc in Computer Science	4MSC05

M.Cons Sci M.Sc in Geography M.Sc in Hydrology M.Sc in Microbiology M.Sc in Physics M.Sc in Human Movement Science M.Sc in Zoology M.Sc in Agriculture (Animal Science) M.Sc in Agriculture (Agribusiness and Management) M.Sc in Agriculture (Plant Science)	4MSC21 4MSC07 4MSC08 4MSC10 4MSC11 4MSC12 4MSC15 4MSC15 4MSC16 4MSC17 4MSC18

S2.2 ADMISSION TO THE DEGREE

- (a) To be admitted to the MSc or MN (Nursing) degree programme a student shall have passed the Nursing Honours or BN (Nursing) or equivalent NQF Level 8 programme with an average final mark of at least 60%. If the average mark for the Nursing Honours or BN (Nursing) degree is less than 60% then admission shall be subject to the approval of the Faculty Board. Applicants must submit to the Head of the relevant Department a full written motivation that details relevant work experience since the award of the Nursing Honours degree, as well as any other information in support of their admittance to the degree. This motivation must be endorsed by the Head of Department before it serves at the Faculty Board.
- (b) While admission into any postgraduate programme is determined by the relevant rules and policies, admission into postgraduate study at the research Master's and Doctoral level is significantly influenced by the processes of predefinition and work prior to formal application.
- (c) All candidates must first discuss their intended topic informally with the HOD and prospective supervisor. If the HOD holds a preliminary view that the candidate meets the minimum academic requirements for admission and has the necessary academic maturity to enrol for the degree, that the proposed topic is suitable, and that supervision capacity and other resources exist in the Department, the HOD will request the candidate to submit a statement of intent.

A statement of intent is not a research proposal but rather a preliminary document that assists the HOD in determining whether a candidate and the proposed research topic are suitable and whether the candidate can proceed to the proposal writing stage. It provides a brief background and contextualization of the intended study as well as some evidence that the candidate has knowledge of research methodology at the appropriate level.

A statement of intent shall contain:

- (a) A preliminary title
- (b) The field of study
- (c) The purpose of and rationale for the study
- (d) An indication of the preliminary work that has been done to determine the suitability of the proposed topic for further in-depth research
- (e) Broad time frames for the research

- (f) Reasons why the candidate is suitable for conducting the type of research proposed
- (g) Any other information that the candidate considers relevant in determining whether the intended research should proceed.

On receipt of the candidate's statement of intent, the HOD shall refer the statement to prospective supervisor(s) with a view to determining whether:

- (a) Suitable supervision capacity exists in terms of expertise and experience
- (b) Potential supervisors are willing and able to accommodate the supervision within their current workloads and in compliance with institutional policy
- (c) The nature and extent of the proposed research render the topic suitable for research towards the proposed postgraduate degree
- (d) The candidate has the necessary motivation and academic background and/or experience in the field of study to undertake the proposed research.

To assist in the decision, an HOD may, where appropriate, request a candidate to present the letter of intent to a departmental meeting or seminar.

The HOD shall approve the statement of intent only if the criteria mentioned above have been met. In appropriate circumstances, where the failure to meet the criteria is not material, the HOD may request that the statement of intent be reworked and resubmitted.

S2.3 DURATION OF THE DEGREE

- (a) Full-time students may complete the degree in a minimum period of one year.
- (b) Students may complete the degree over a maximum period of two years.
- (c) The total duration of the degree shall not exceed two years beyond the minimum period.

S2.3 CURRICULUM

- (a) Unless specified to the contrary in the Departmental rules, the Master degree will consist of a research dissertation.
- (b) Students who do not have the necessary grounding in certain skills may be required to register for and pass specific modules in addition to the prescribed curriculum.
- (c) The degree is offered subject to:
 - (i) the availability of staff with expertise relevant to the chosen research topic.
 - (ii) the availability of resources required to conduct the research.

S2.4 PROPOSAL SUBMISSION AND PROGRESS

- (a) A research proposal must be compiled according to the following guidelines and this must be finalised within six months of registration for the first time:
 - **Step 1.** The student prepares a research proposal, as per the postgraduate proposal guidelines, with guidance from the supervisor.
 - **Step 2.** The proposal is presented to the relevant Department through a proposal seminar.
 - **Step 3.** After the recommended corrections, the proposal is sent for review through the faculty research committee representative. Based on the two reviewers' recommendations, corrections are made to the satisfaction of the supervisor.
 - **Step 4.** Once corrections are finalized, the supervisor or HoD make arrangements via the dean's office for the presentation of the proposal to a faculty panel, consisting of representatives from relevant departments and chaired by the dean/deputy dean or a nominated senior academic. An electronic copy of the proposal is sent out to the faculty in good time. The student presents the proposal orally in 15-20 minutes, after which the panel has the opportunity to ask questions and make suggestions. The panel must pay particular attention to the research methodology and the ability of the student to complete the research. The title is also discussed and finalised. The student leaves and the panel formally decide to approve / approve with changes / disapprove the proposal.
 - **Step 6.** Once corrections are made according to the faculty panel's recommendations, the proposal is then sent to the Faculty Research Ethics Committee for provisional ethical clearance. The documents submitted electronically to the ethics committee representative must include the proposal, a plagiarism report and where applicable, all research and survey instruments (informed consent form, questionnaires, interview schedule, permission letters to conduct the research, permit).
 - **Step 7.** The HoD formally applies for the approval of the dissertation title and the project proposal to the Faculty Board. The following information must be supplied:
 - 1. A cover letter from the HoD providing the following:
 - a) Student's name and student number.
 - b) The title of the dissertation.
 - c) The names of supervisors and co-supervisors. If these are not University of Zululand employees, then CV's must be attached.
 - d) The names and designations of faculty panel members.
 - e) A statement that the panel has found the proposal worthy for a MSc or PhD study.
 - f) The date of the proposal presentation.
 - 2. Registration of the proposal form (HDC01).
 - 3. Appointment of Supervisor and Co-supervisor form (HDC03).
 - 4. Faculty checklist with all relevant signatures.
 - 5. The Faculty Research Ethics Committee's recommendation letter for provisional ethical clearance.
 - 6. Memorandum of Understanding (MOU) (must be signed).
 - 7. Research proposal (signed)

8. Plagiarism (Turnitin) report

- (b) In the event of the project proposal not being finalised within six months of registration, the student and the supervisor must meet with the Dean to discuss the reasons for the delay and to determine what action may be needed.
- (c) The student will, after each semester, submit a progress report on the prescribed form to their Head of department. This report should outline the research conducted during in the preceding six months, highlight difficulties and problems encountered, and indicate whether the research is on schedule. The report will be submitted to the Dean.
- (d) In the event of no progress report being submitted or if the progress report does not reflect satisfactory progress, the student and the supervisor must meet with the Dean to discuss the reasons for the delay and to determine what action may be needed.

S2.5 ASSESSMENT

- (a) The dissertation will not be sent to the examiners unless the following are received at the office of the Dean or Deputy Dean Research:
 - (i) A report written by the supervisor(s) that outlines relevant information concerning the research project that the examiners should be aware of.
 - A letter confirming that the dissertation has been edited for the use of English
 - (iii) A summary report from a recognised plagiarism detection service which confirms that the dissertation contains no plagiarised material
- (b) The Masters dissertation will be examined by at least two external examiners from different Universities.
- (c) The final mark for the Master degree will be recommended to the Faculty Board by an examinations committee. At least one of the supervisors must attend the examinations committee.
- (d) The examinations committee may recommend one of the following outcomes:
 - (i) The dissertation is accepted without changes.
 - (ii) The dissertation is accepted subject to minor corrections being completed to the satisfaction of the supervisor(s).
 - (iii) The dissertation is referred back to the student for more extensive revision and when this has occurred, the dissertation will be resubmitted for examination and the examinations committee will reconvene when the examiners reports have been received.
 - (iv) The dissertation is failed.
- (e) If rules S35 (d) (i), S35 (d) (ii) or S35 (d) (iv) apply, the final mark will be based on the recommendations of the examiners.
- (f) If rule S35 (d) (iii) applies and the revised dissertation is passed, the dissertation will be awarded a final mark of 50%. If the revised dissertation is failed, then the final mark will be based on the recommendations of the examiners.
- (g) A final mark of below 50% constitutes a fail.

(h) The General Rules that relate to the classification of the degree (distinction, merit) apply.

S2.6 ATTAINMENT AND CONFERMENT OF DEGREE

- (a) The qualification must be completed in no more than two years beyond the minimum prescribed time for that qualification. Only years that have been registered are used in determining the number of years taken by a student.
- (b) The degree will not be awarded unless the following have been received by the examinations section:
 - (i) Sufficient professionally bound copies of the dissertation such that two will be retained by the University and one will be provided to each examiner of the dissertation. In addition, the University of Zululand library requires an electronic version of the dissertation saved on a CD/DVD in a suitable format.
 - (ii) A letter signed by the supervisor, endorsed by the HoD and the Dean that states that all corrections and/or revisions requested by the examiners have been attended to.
- (c) Students who have satisfied all of the academic requirements of the degree as outlined in these rules and in Departmental rules, will be deemed to have completed the degree.
- (d) The conferral of the degree at a graduation ceremony will only occur once all administrative and financial requirements have been met in addition to the academic requirements.

S3 DOCTORAL PROGRAMMES

S3.1 DISCIPLINES

The degree may be taken in the following disciplines:

S3.2 ADMISSION TO THE DEGREE

(a) To qualify for admission to a Doctoral degree programme a student shall possess a Master's degree in the subject she/he wishes to enrol for or have the approval of Senate for conferment of status equivalent to such a degree. (b) To be admitted to the Doctoral degree programme a student shall have passed the Master's degree with an average final mark of at least 60%. If the average mark for the Master's degree is less than 60% then admission shall be subject to the approval of the Faculty Board. Applicants must submit to the Head of the relevant Department a full written motivation that details relevant work experience since the award of the Master's degree as well as any other information in support of their admittance to the degree. This motivation must be endorsed by the Head of Department before it serves at the Faculty Board.

S3.3 DURATION OF THE DEGREE

- (a) Full-time students may complete the degree in a minimum period of two years.
- (b) Students may complete the degree over a maximum period of three years.
- (c) The total duration of the degree shall not exceed two years beyond the minimum period.

S3.4 CURRICULUM

- (a) The Doctoral degree will consist of a research thesis.
- (b) Students who do not have the necessary grounding in certain skills may be required to register for and pass specific modules in addition to the prescribed curriculum.
- (c) The degree is offered subject to:
 - (i) the availability of staff with expertise relevant to the chosen research topic and
 - (ii) the availability of resources required to conduct the research.

S3.5 PROPOSAL SUBMISSION AND PROGRESS

- (a) A research proposal must be compiled according to the guidelines, following the same processes and procedures as stipulated for MSc proposals under S34(a). Proposals must be finalised within eight months of registration for the first time.
- (b) In the event of the project proposal not being finalised within eight months of registration, the student and the promoter must meet with the Dean to discuss the reasons for the delay and to determine what action may be needed to take place
- (c) The student will, after each semester, submit a progress report on the prescribed form to their HoD. This report should outline the research

conducted during in the preceding six months, highlight difficulties and problems encountered, and indicate whether the research is on schedule. The report will be submitted to the Dean.

(d) In the event of no progress report being submitted or if the progress report does not reflect satisfactory progress, the student and the promoter must meet with the Dean to discuss the reasons for the delay and to determine what action may be needed to take place

S3.6 ASSESSMENT

- (a) The thesis will not be sent to the examiners unless the following are received at the office of the Executive dean:
 - A report written by the promoter(s) that outlines relevant information concerning the research project that the examiners should be aware of.
 - (ii) A letter confirming that the thesis has been edited for the use of English
 - (iii) A summary report from a recognised plagiarism detection service which confirms that the thesis contains no plagiarised material
- (b) The Doctoral thesis will be examined by at least three external examiners. Two of the examiners are based at institutions outside of the borders of South Africa.
- (c) The outcome of the Doctoral degree will be recommended to the Faculty Board by an examinations committee. At least one of the promoters must attend the examinations committee.
- (d) The examinations committee may recommend one of the following outcomes:
 - The thesis is accepted without changes
 The thesis is accepted subject to minor control
 - (ii) The thesis is accepted subject to minor corrections being completed to the satisfaction of the promoter(s)
 - (iii) The thesis is referred back to the student for more extensive revision and when this has occurred, the thesis will be resubmitted for examination and the examinations committee will reconvene when the examiners reports have been received
 - (iv) The thesis is failed
 - (b) A doctoral thesis will only be classified as a pass or as a fail. No final mark is awarded.

S3.7 ATTAINMENT AND CONFERMENT OF DEGREE

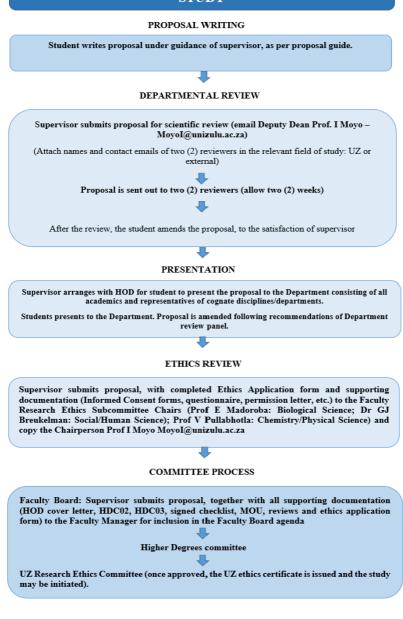

- (a) The qualification must be completed in no more than two years beyond the minimum prescribed time for that qualification. Only years that have been registered are used in determining the number of years taken by a student.
- (b) The degree will not be awarded unless the following have been received by the examinations section:
 - (i) Sufficient professionally bound copies of the thesis such that two will be retained by the University and one will be provided to each examiner of the thesis. In addition, the University of Zululand library

requires an electronic version of the thesis saved on a CD/DVD in a suitable format.

- (ii) A letter signed by the promoter, endorsed by the head of department and the Executive Dean that states that all corrections and/or revisions requested by the examiners have been attended to.
- (c) Students who have satisfied all of the academic requirements of the degree as outlined in these rules and in Departmental rules, will be deemed to have completed the degree.
- (d) Examination results and confirmation for graduation will be approved by SENEX.
- (e) The conferral of the degree at a graduation ceremony will only occur once all administrative and financial requirements have been met in addition to the academic requirements.

Roadmap for Registration of MSc/PhD Study

FSAE ROADMAP FOR REGISTRATION OF MSC/PHD STUDY

LIST OF HONOURS MODULES OFFERED BY THE FACULTY					
(ALL NQF 8)					
	4BCH501	Advanced Biotechnology			
	4BCH502	Techniques in Molecular Biology			
	4BCH503	Advanced General Biochemistry			
Biochemistry	4BCH504	Clinical Biochemistry			
and Microbiology	4BCH509	Research Project			
wiiciobiology	4MCB501	Advanced Biotechnology			
	4MCB502	Techniques in Molecular Biology			
	4MCB505	Environmental and Industrial Microbiology			
	4MCB509	Research Project			
	4BSS501	Health Promotion			
	4BSS502	Exercise Physiology			
	4BSS503	Biomechanics and Human Motor Behaviour			
	4BSS504	Professional Internship			
Human Movement	4BSS505	Management of Orthopaedic Injuries and Conditions			
Science	4BSS506	Management of Chronic Diseases and Disabilities			
	4BSS507	Adapted Physical Activity			
	4BSS508	Testing and Measurement			
	4BSS509	Research Methodology and Project			
	4BOT501	Ecology and Conservation			
	4BOT502	Aquatic Botany			
	4BOT503	Secondary Plant Metabolites			
Botany	4BOT504	Ecophysiology			
Botany	4BOT505	General Botany			
	4BOT506	Economic Botany			
	4BOT507	Ethnobotany			
	4BOT509	Research Project			
	4CHM501	Analytical Chemistry			
	4CHM502	Inorganic Chemistry			
Chemistry	4CHM503	Organic Chemistry			
	4CHM504	Physical Chemistry			
	4CHM509	Research Project			
Computer Science	4CPS501	Advanced Software and Distributed- Computing Techniques			

		Advanced Distributed Database Techniques		
	4CPS502	and Applications		
	4CPS503	Compilation Techniques and Security for WS and SOA		
	4CPS504	Wireless Networks with special focus on ad hoc networks and their Simulations		
	4CPS505	Advanced Database Techniques and Security for WS and SOA		
	4CPS506	Software Defined Networking Theory and Application		
	4CPS509	Research Project		
	4CNS501	Non-formal Education and Extension		
	4CNS502	Family studies and Household Resource Management		
	4CNS503	Clothing		
Consumer	4CNS504	Housing and Interior Design		
Sciences	4CNS505	Community Nutrition		
	4CNS506	Food		
	4CNS507	Advanced Nutrition		
	4CNS508	Research Methods		
	4CNS509	Research Project and Oral		
	4GES501	History, Philosophy and Methodology of Geography		
	4GES502	Applied Climatology		
	4GES503	Environmental Management		
Geography	4GES504	Geomorphology		
	1GES505	Urban Geography		
	1GES506	Rural Geography		
	4GES509	Research Project		
	4HYD501	Soil Hydrology		
	4HYD502	Groundwater Studies		
	4HYD503	Hydrological Modelling		
Hydrology	4HYD504	Water Resources Management		
	4HYD505	Hydroinformatics		
	4HYD506	Disaster Management		
	4HYD509	Research Project		
	4MTH501	Measure Theory		
Mathematical	4MTH502	Algebra		
Sciences	4MTH503	Differential Equations		
	4MTH504	Numerical Analysis		

	4MTH505	Topology	
	4MTH506	Functional Analysis	
	4MTH509	Research Project	
	4AMT501	General Relativity	
	4AMT502	Relatavistic Cosmology	
	4AMT503	Differential Geometry	
	4AMT504	Numerical Analysis	
	4AMT505	Continuum Mechanics	
	4AMT506	Optimisation	
	4AMT509	Research Project	
	4STT501	Queueing Theory	
	4STT502	Time Series Analysis	
	4STT503	Categorical Data Analysis	
	4STT504	Linear Programming	
	4STT505	Econometrics	
	4STT506	Special Topic	
	4STT509	Research Project	
	4STT501	Categorical Data Analysis	
	4STT502	Time Series Analysis	
	4STT503	Multivariate Analysis	
	4STT504	Correspondence Analysis and Biplots	
	4STT505	Stochastic Processes	
	4STT506	Probability Theory	
	4STT509	Research Project	
	4PHY501	Mathematical Methods of Physics	
	4PHY502	Advanced Quantum Mechanics	
	4PHY503	Nuclear Physics, Radioactivity and Applications	
Dhusiaa	4PHY504	Solid State Physics and Applications	
Physics	4PHY505	Advanced Electrodynamics	
	4PHY506	Advanced Statistical Mechanics	
	4PHY507	Electronics and Applications	
	4PHY509	Research Project	
	4ZOL501	Population Dynamics and Aquatic Production	
	4ZOL502	Advanced Freshwater Ecology	
Zoology	4ZOL503	Advanced Estuarine Ecology	
	4ZOL504	Ecophysiology	
	4ZOL509	Project Design & Implementation	
	4ZUL009	r roject Design & implementation	

Department of Agriculture

STAFF				
Professor	GE Zharare, BScHons (Crop Science) (University of Zimbabwe), MSc Crop (Physiology) (Reading University, UK), PhD (Agronomy) (Queensland, AUS)			
	KC Lehloenya, BSc (Agriculture) (NUL), BScAgricHons, MSc (Agriculture), PhD (Agriculture) (UFS)			
Associate Professors	FN Fon, BSc (Biochemistry) (Buea, Cameroon), BScHons (Biochemistry), MSc (Agriculture), PhD (Agriculture) (UKZN)			
	M Sibanda, BSc (Agriculture) (Agricultural Economics), BScHons (Agriculture) (Agricultural Economics), MSc (Agriculture) (Agricultural Economics), PhD (Agricultural Economics) (UFH); PGDipHE (UKZN); ULDP (USB); Strengthening Postgraduate Supervision (SPS); Assessor and Moderation in Higher Education			
Lecturers	Development Course (Rhodes University) SP Dludla, BSc (Agriculture) (Animal Science), BScHons (Agriculture), MSc (Agriculture) (UNIZULU)			
	F Thabethe BSc (Agriculture - Animal Science) (UNIZULU), MSc (Agriculture - Animal Science), PhD (Agriculture - Animal Science) (UKZN) P Jiba, BSc (Agriculture) (Agricultural

	Economics) (NWU) MM Selepe, BSc (Agriculture) (Animal Science), MSc (Agriculture) (Animal Science) (UNIZULU) Y Nontu, BSc (Agriculture) (Agricultural			
	Economics) (Hons), MSc (Agriculture) (Agriculture Economics), (UFH) SJ Mnembe, BSc (Environmental Science), BSc			
	Hons (Soil Science), MSc (Soil Science) (UKZN) LG Buthelezi, BSc (Agriculture) (Agronomy); MSc (Botany) (UNIZULU) ; PhD Botany (UNIZULU)			
nGAP Lecturers	KPM Lekola, BSc Agriculture (Animal Production); MSc Agriculture (Animal Production) (University of Limpopo) ZL Ndou, BSc (Agriculture) (Plant Production); MSc (Agriculture) (Crop Protection) (UNIVEN)			

Secretary	NZ Khumalo, BSc (Agriculture) (Agribusiness), MSc (Agriculture) (Agribusiness) (UNIZULU) RT Phakathi, Dip (Pub Admin), BA (Development Studies) (UNIZULU), HDip (Community Work) (UNIZULU)
Senior Laboratory Technician	L Maupa, NDip (Analytical Chemistry) (N. Gauteng); BTech Laboratory Management (Tshwane University of Technology)
Laboratory Assistants	(Agriculture) (UNIZULU)
Farm Manager	S Malinga, BTech (Agriculture Management) (Nelson Mandela University); Hons (Agriculture); Masters (Agriculture) (UKZN)
Farm Foreman	FM Hadebe, National Diploma (Agricultural Management) (UNISA); BTech (Agricultural Management) (UNISA)
Farm Driver Farm Assistants	MF Mathenjwa A Biyela N Biyela H Duma B Khumalo K Khumalo SW Makhathini Z Mthiyane P Mthiyane E Ndlovu S Nzuza SL Tshabalala K Zwane

MSc (Agriculture) [QUALIFICATION CODES: 4MSC16, 4MSC17, 4MSC18]

The General rules and the Faculty rules pertaining to Masters study apply

Curriculum

A candidate shall propose, conduct and report on a research project in the module relevant to one of the following options:

Animal Science [4MSC16]

4AAS700 Animal Science

Agribusiness and Management [4MSC17]

4AAE700 Agribusiness

Plant Science [4MSC18]

4AAG700 Plant Science

D.Agric (Agriculture) [QUALIFICATION CODES: 4PHD16, 4PHD17, 4PHD18]

The General rules and the Faculty rules pertaining to Doctoral study apply

Curriculum

A candidate shall propose, conduct and report on a research project in the module relevant to one of the following options:

Animal Science [4PHD16]4AAS800Animal SciencePlant Science [4PHD17]4AAG800Agribusiness

Agribusiness and Management [4PHD18]

4AAE800 Plant Science

Department of Biochemistry and Microbiology

<u>STAFF</u>	
Professor	SP Songca, PhD (Organic Chemistry) (Queen Mary University of London)
	K Syed, PhD (Biochemistry) (Sri Krishnadevaraya University, India)
	E Madoroba, PhD (Microbiology) (UP)
Lecturers	J Shandu, BScHons, MSc (UNIZULU)
	MS Goqo-Mathenjwa, PhD Biochemistry (UZ)
	Dr N Hlengwa, PhD, (Biochemistry) (UNIZULU)
	HP Mbongwa, PhD, (Biochemistry) (NW)
	ZG Ntombela, PhD (Microbiology) (UNIZULU)
Senior Laboratory Assistants (UNIZULU)	TG Dube, BSc (Hydrology & Microbiology)
	SF Ndulini, MSc Microbiology (UZ)
Laboratory Assistants	RD Mthembu

BSc (Hons) (Biochemistry) [QUALIFICATION CODE 4HON02]

Admission Requirements

A BSc degree in Biochemistry.

Curriculum/Examination

Theory Modules

4BCH501	Advanced Biotechnology
4BCH502	Techniques in Molecular Biology
4BCH503	Advanced General Biochemistry
4BCH504	Clinical Biochemistry

4BCH501 and 4BCH502 are compulsory. A student may take any two of 4BC503, 4BC504, or any other one honours level module in a related discipline approved by the Head of Department of Biochemistry and Microbiology. Each of the theory modules is examined with a three-hour paper.

Research Module

4BCH509 Seminar and Research Project

This module is compulsory and students must undertake a research project and compile a seminar on a topic approved by the Department of Biochemistry and Microbiology. The student will be orally examined on his / her project report.

Remarks

This is a one-year qualification for full-time students with the emphasis on techniques and the application thereof in biochemical research. The seminar must be completed, typed and handed in before the end of the first semester in the case of full-time students. The project extends over one semester in the case of full-time students. A typed report on the project must be handed in and presented orally before the oral examination. Final Mark: Each of the theory modules presented contributes 1/6 of the final mark and the research project contributes 1/3 of the final mark.

MSc (Biochemistry) [QUALIFICATION CODE 4MSC02, MODULE CODE 4BCH700]

Admission requirements

An Honours Bachelor's degree in Biochemistry or equivalent qualification subject to the approval of the Department of Biochemistry and Microbiology and the Faculty Board of Science and Agriculture.

Final admission to the degree shall be subject to the approval by the Faculty Board of Science and Agriculture on the recommendation of the Department of Biochemistry and Microbiology.

Duration of Degree

A minimum registration period of at least 1 year full-time after obtaining the BSc Honours degree in Biochemistry.

Curriculum / Examination

The presentation of a dissertation on a research project chosen to satisfy the objectives of the Department of Biochemistry and Microbiology as well as the Faculty Board of Science and Agriculture.

The presentation of at least one seminar on an approved topic.

Additional courses or advanced lectures on current topics which may be prescribed by the Department Biochemistry and Microbiology in special circumstances.

The preparation of at least one article on the dissertation for publication in a recognised journal.

PhD (Biochemistry) [QUALIFICATION CODE 4PHD02, MODULE CODE 4BCH800]

Admission requirements

A Master's degree in Biochemistry or equivalent qualification subject to the approval of the Department of Biochemistry and Microbiology.

Duration of Degree

A minimum of at least 2 years after obtaining the MSc degree in Biochemistry.

Curriculum / Examination

When deemed necessary by the Department, formal lectures may be offered on topics of current interest in Biochemistry, or additional courses in this or any other in the Department Biochemistry and Microbiology may be prescribed and the candidate examined, accordingly.

The presentation of a thesis on a research project chosen to satisfy the objectives of the Department of Biochemistry and Microbiology as well as the Faculty Board of Science and Agriculture.

The presentation of at least two articles on the thesis for publication in a recognised journal.

The formulation of an original research project presented in the form of a seminar. The proposition may deal with any topic not investigated experimentally in the thesis, but which nevertheless relates to a registered research project in the Department of Biochemistry and Microbiology.

BSc (Hons) (Microbiology) [QUALIFICATION CODE 4HON10] Admission requirements

A BSc degree in Microbiology.

Curriculum

Theory modules

4MCB501	Advanced Biotechnology
4MCB502	Techniques in Molecular Biology
4MCB504	Clinical Microbiology
4MCB505	Environmental and Industrial Microbiology
4BCH509	Seminar and Research Project

4MCB501 and 4MCB502, are compulsory. A student may take any two of 4MCB504, 4MCB505, or any other one honours level module in a related discipline approved by the Head of department. Each of the theory modules is examined with a three-hour paper.

Research module

4MCB509 Seminar and Research Project

This module is compulsory and students must undertake a research project and compile a seminar on a topic approved by the Department of Biochemistry and Microbiology. The student will be orally examined on his / her project report at SASM South African Society of Microbiology, KZN).

Remarks

This is a one-year qualification for full-time students with the emphasis on techniques and the application thereof in microbiological research. The seminar must be completed, typed and handed in before the end of the first semester in the case of fulltime students. The project extends over one semester in the case of full-time students. A typed report on the project must be handed in and presented orally before the oral examination. Final Mark: Each of the theory modules presented contributes 1/6 of the final mark and the research project contributes 1/30f the final mark.

MSc (Microbiology) [QUALIFICATION CODE 4MSC10, MODULE CODE 4MCB700]

Admission requirements

An honours bachelor's degree in Microbiology or equivalent qualification.

Final admission to the degree shall be subject to the approval by the Faculty Board of Science and Agriculture on the recommendation of the Department of Biochemistry and Microbiology.

Duration of Degree

A minimum registration period of at least 1 year full-time after obtaining the BSc Honours Degree in Microbiology.

Curriculum / Examination

The presentation of a dissertation on a research project chosen to satisfy the objectives of the Department of Biochemistry and Microbiology as well as the Board of the Faculty.

The presentation of at least one seminar on an approved topic.

Additional courses or advanced lectures on current topics which may be prescribed by the Department in special circumstances.

The preparation of at least one article on the dissertation for publication in a recognised journal.**PhD (Microbiology) [QUALIFICATION CODE 4PHD10, MODULE CODE 4MCB800]**

Admission requirements

A master's degree in Microbiology or equivalent qualification subject to the approval of Department of Biochemistry and Microbiology.

Duration of Degree

A minimum registration period of 2 years full-time is required after obtaining the MSc degree in Microbiology.

Curriculum / Examination

When deemed necessary by the Department, formal lectures may be offered on topics of current interest in Microbiology, or additional courses in this or any other Department may be prescribed and the candidate examined, accordingly.

The presentation of a thesis on a research project chosen to satisfy the objectives of the Department of Biochemistry and Microbiology as well as the Faculty Board of Science and Agriculture.

The presentation of at least two articles on the thesis for publication in a recognised journal.

The formulation of an original research project presented in the form of a seminar. The proposition may deal with any topic not investigated experimentally in the thesis, but which nevertheless relates to a registered research project of the Department of Biochemistry and Microbiology.

Title	Advanced Ristochnology			
	Advanced Biotechnology			
Code	4MCB501/4BCH501	Department	Biochemistry	
Prerequisites	None	Co-requisites	None	
Aim	This module will cover wide practical applications of biotechnology with an aim of introducing students to applied biotechnological processes. To introduce and provide skills required in establishing and maintaining an industrial bioprocess. To introduce advance aspects of environmental biotechnology and microbial ecology. To expose students to the applications of microbial processes in addressing environmental issues such as environmental sustainability and management			
Content	and management. Screening and strain improvement technologies. Bioprocess and production technologies. Product recovery and down streaming process. Advances in biotechnology principles and biotechnological applications. Selected topics covering advances, analytical and practical applications in the field of environmental biotechnology. Latest topics in advances and developments in environmental microbiology and microbial ecology. The topics may change year to year and may include sources of pollution and pollution control strategies, microbial responses to stress, aerobic and anaerobic digestion, biofiltration, bioleaching, bioremediation, solid waste wastewater management and control, genetic based methods in microbial ecology, biodiversity, metagenomics, microbial biofilms, microbial interactions with their biotic and			
Assessment	1X assignment (25%), 2X presentations (25%), 3 hour theory exam (50%)			
DP Requirement	None			

Title	Techniques in Molecular Biology			
Code	4BCH502/4MCB 502	Department Biochemistry & Microbiology		
Prerequisites	None	Co-requisites		None
Aim	This module will cover modern techniques applied in molecular biology. The principles of the techniques will be covered in relation to their practical application in research and industry.			
Content	Microscopy, radiochemistry, fluorescence, centrifugation, spectroscopy, recombinant DNA & cloning, recombinant protein expression and purification, PAGE (protein analysis), PCR, Blotting, techniques in proteomics, Bioinformatics			
Assessment	1X assignment (25%), 2X presentations (25%), 3 hour theory exam (50%)			
DP Requirement	None			

Title	Advanced General Biochemistry				
Code	4BCH503 Department Biochemistry				
Prerequisites	None	Co-requisites	None		
Aim	This module covers the folded conformation of proteins and how the folding determines the various functions of proteins.				
Content	how the folding determines the various functions of proteins. Conformation of protein: Structure and function relationship of proteins; structural proteins (collagen, keratin, silk, wool), transport proteins (hemoglobin, myoglobin, cytochromes), catalytic proteins (enzymes) Enzyme catalysis: mechanism of enzyme catalysis (General acid/base, covalent). Structure and mechanism of action of selected enzymes. Kinetics of bisubstrate and multisubstrate reactions, control of enzyme reactions, allosterism, isoenzymes, immobilized enzymes Free radicals and anti-oxidants Current topics in Biochemistry				
Assessment					
DP Requirement					

Title	Clinical Microbiology		
Code	4MCB504	Department Biochemistry/Microbiology	
Prerequisites	None	Co-	None
		requisites	
Aim	This module will cover the study the study of pathogenic		
	Microorganisms related to South Africa and epidemiology.		
Content	The study selected pathogenic bacteria, viruses, protozoon and fungi. Diseases, symptoms, treatment and prevention. Detailed study of epidemiology		
Assessment	3 Hour exam paper, 1 X assignment, 1 X presentation		
DP	None		
Requirement			

Title	Clinical Biochemistry		
Code	4BCH504	Department	Biochemistry
Prerequisites	None	Co-requisites	None
Aim	This module deals with the pathophysiology, patho-biochemistry and clinical testing of disease and its application to the diagnosis. It requires the performance of relevant biochemical tests, analysis of body fluids and interpretation of the test results.		
Content	of body fluids and interpretation of the test results. Clinical testing. Disturbances of water, sodium and potassium balance. Acid-base balance. Renal and liver diseases. Disorders of carbohydrate and lipid metabolism. Disorders of iron, porphyrin and purine metabolism. Disorders of the endocrine glands (pituitary and hypothalamus, thyroid gland, adrenal cortex and medulla and the gonads). Locomotor and nervous system diseases, Metabolic aspects of malignant diseases. Inherited metabolic diseases. Therapeutic drug monitoring and chemical toxicology		

Assessment	1X assignment (25%), 2X presentations (25%), 3 hour theory exam (50%)
DP	None
Requirement	

Title	Environmental and	Industrial Microbi	ology
Code	4MCB505	Department	Biochemistry and Microbiology
Prerequisites	None	Co-requisites	None
Aim	This module discusses the uses of microorganisms in processes that are grouped under the heading of industrial microbiology and environmental microbiology. The use of genetically engineered microorganisms to increase the efficiency of the processes and to produce new or modified products is discussed, as is the integration of biological and chemical processes to achieve a desired objective. The module concludes with discussions of biodegradation, some recent biotechnological applications, and the impact		
Content	 of microbial biotechnology on ecology and human society. Sources of microorganisms for use in industrial microbiology and biotechnology Genetic manipulation of microorganism to construct strains that better meet the needs of an industrial or biotechnological process Preservation of microorganisms Design or manipulation of environments in which desired processes will be carried out Management of growth characteristics to produce the desired product Major products or uses of industrial microbiology and biotechnology The use of microorganisms in manufacturing biosensors, microarrays, and biopesticides The manipulation of microorganisms in the environment to control biodegradation 		
Assessment			
DP Requirement	Completion of all ass activities of the modu		e participation in all

Title	Research Project		
Code	4BCH509/ 4MCB509	Department	Biochemistry/Microbiology
Prerequisites	BSc Biochemistry	Co-	None
	or Microbiology	requisites	
Aim	Application of laboratory methods in designing and conducting		
	independent research. Writing and presenting research project.		
Content	Identification of the area and the topic of the research		

	Literature review relevant to the topic. Refine problem rational Design of the research project and set up of experimental protocols Training and implementing laboratory skills relevant to protocols Preparation for fieldwork. Sampling, data collection, processing of samples Analysis of data. presentation, interpretation and analysis of the results Write up of the research project. Oral presentation of research findings
Assessment	Final research report (written and oral presentation)
DP	
Requirement	

Department of Botany

STAFF

Associate Professor Senior Lecturers

Lecturer Laboratory Assistants NR Ntuli, PhD (UNIZULU) THC Mostert, PhD (UP) CM van Jaarsveld, MSc (NWU); PhD (UFS) Z Mbele, PhD (UNIZULU) S Ngubane, MSc (UNIZULU) ZBG Ngcobo, NDip (Chem Eng) (MUT) PN Sokhela, BSc (Hons) (UNIZULU)

BSc (Hons) (Botany) [QUALIFICATION CODE 4HON03]

Admission Requirements

A BSc degree in Botany, with a final average mark of 60% for the core modules in the 3rd year level of study.

Curriculum

The qualification will be presented in seminar form and a student shall select THREE theory modules in consultation with the Head of the Department. Research Methods (4CNS508) and Research Project (4BOT509) modules are compulsory. Candidates must submit a report of a practical project (4BOT509) done by them. The mark for the research project will form one-third ($\frac{1}{3}$) of the final mark. Apart from a final average mark of 50%, all the modules of the honours qualification must be passed for the degree to be awarded.

Theory

4BOT501	Ecology and Conservation
4BOT502	Aquatic Botany
4BOT503	Secondary Plant Metabolites (Prerequisite: 4BOT311, 4BOT321)
4BOT504	Ecophysiology
4BOT505	General Botany
4BOT506	Economic Botany
4BOT 507	Ethnobotany
4BOT 509	Research Project

Examination

Four, 3-hour papers on theory (4BT501-507) and 4BOT509 project.

MSc (Botany) [QUALIFICATION CODE 4MSC03, MODULE CODE 4BOT700]

Admission Requirements

An honours degree in Botany or equivalent qualification subject to the approval of the Faculty Board of Science and Agriculture on recommendation of the Department of Botany.

Curriculum

A dissertation on original research carried out under supervision in one or more of the following divisions of botany: anatomy, morphology, ethnobotany, ecology, physiology, taxonomy and microbiology.

A research proposal on the subject of the dissertation is written and presented to the Faculty.

An external examination of the dissertation is required.

The preparation of at least one article on the dissertation for publication in a recognised journal.

PhD (Botany) [QUALIFICATION CODE 4PHD03, MODULE CODE 4BOT800]

Admission Requirements

A Master's degree in Botany or equivalent qualification subject to the approval of the Faculty Board of Science and Agriculture on recommendation of the Department of Botany.

Curriculum

A research proposal on the subject of the dissertation is written and presented to the Faculty.

An external examination of the thesis is required.

The preparation of at least two articles on the thesis for publication in a recognised journal.

Title	ECOLOGY AND CONSERVATION		
Code	4BOT501	Department	BOTANY
Prerequisites	4BOT321, 4BOT322	Co-requisites	
Aim	To develop an understanding of the dynamics of and plant communities and plant succession in Maputaland area.		
Content	A study of the plant succession in Maputalind area. A study of the plant community and community dynamics; plant communities and plant succession in Zululand; vegetation analysis, with emphasis on the practical application of the different methods of surveying vegetation; a study of environmental factors and their influence on the community; plant geography with particular reference to the vegetation of Maputaland; restoration ecology.		
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments		

Title	AQUATIC BOTANY		
Code	4BOT502	Department	BOTANY
Prerequisites	4BOT321, 4BOT322	Co-requisites	
Aim		vironmental influer vival in fresh wate	nces on periphyton and er ecosystems.
Content	Stress, disturbance and competitive pressures in macrophyte community dynamics; the importance of wetlands in supporting and maintaining freshwater ecosystems; relative efficiency and ecological problems of aquatic plant management; long-term ecosystem monitoring.		
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments		
DP Requirement	50% Continuous assessment mark		

Title	SECONDARY	PLANT METABO	LITES
Code	4BOT503	Department	BOTANY
Prerequisites	4BOT311, 4BOT321	Co-requisites	
Aim	To develop an understanding of the biosynthesis, occurrence, structure and functions of secondary plant products.		
Content	Occurrence, structure, biosynthesis, catabolism and functions of secondary plant products which act as phytoalexins (isoflavonoids, sesquiterpenes) and non-protein amino acids. The importance of carotenoids in photosynthesis, changes in photosynthesis during leaf development, the biochemistry of herbicide action, biosynthesis and metabolism of ABA, auxin and GA prior to and during leaf yellowing in annual plants.		
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments		
DP Requirement	50% Continuou	s assessment ma	rk

Title	ECOPHYSIOLOGY		
Code	4BOT504 Department BOTANY		BOTANY
Prerequisites	4BOT311, 4BOT321	Co-requisites	
Aim	To develop an understanding of water, mineral absorption		
	and various metabolic processes of plants.		

Content	Water economy of plants; photosynthesis; respiration; carbohydrate metabolism; lipid and nitrogen metabolism; vitamins and hormones; photoperiodism; history of botany; principles of statistics as applied to biology.
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments
DP Requirement	50% Continuous assessment mark

Title	GENERAL BOTANY			
Code	4BOT505	Department	BOTANY	
Prerequisites	4BOT311, 4BOT321 or 4BOT312, 4BOT322	Co-requisites		
Aim		This module is designed to add to the content of the students area of specialization as determined by the research project.		
Content	The content to be studied will be determined according to the selection of modules by the student and the intended direction of specialization. Special fields in Botany like Taxonomy, Genetics, Anatomy, Morphology etc. where expertise exist in the department, can also be covered in this module.			
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments			
DP Requirement	50% Continuou	s assessment mai	rk	

Title	ECONOMIC BOTANY		
Code	4BOT506	Department	BOTANY
Prerequisites	4BOT311, 4BOT321 or 4BOT312, 4BOT322	Co-requisites	
Aim	This module is designed to develop an understanding of the value of the natural environment.		
Content	To estimate the quantities of botanical resources and the study of direct use-value of marketable resources and the significance of subsistence activities and non-marketed resources that add to the total value of the environment.		
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments		
DP Requirement	50% Continuous assessment mark		

Title	ETHNOBOTANY		
Code	4BOT507	Department	BOTANY
Prerequisites	4BOT311, 4BOT321 or 4BOT312, 4BOT322	Co-requisites	
Aim			op an understanding of how u's) make use of indigenous
Content	The module explores how indigenous plants that are harvested from the wild are used as food, shelter, medicine, clothing, hunting and in religious ceremonies. Plants that are grown in the homesteads (home gardens) are studied with reference to identification, position on the premises, cultivation, uses and conservation status.		
Assessment	Formative: Continuous assessment, 50% (Assignments) Summative: 3-hour final examination, 50% 50% sub-minimum in all assessments		
DP Requirement	50% Continuou	s assessment mai	rk

Title	RESEARCH PROJE	СТ	
Code	4BOT509	Department	BOTANY
Prerequisites	4BOT311, 4BOT321 or 4BOT312, 4BOT322	Co-requisites	
Aim	The module is aimed at preparing students with skills for independent scientific research. Under guidance from academic staff, students undertake pure or applied research of on a topic relating to the field of research in the Department of Botany.		
Content	students are expected survey; conduct fiel analyse data and int report of the resear structured and accur	ely depend on the topic d to undertake an exten ldwork as part of da erpret results; and pres ch that is well presen rately referenced. Stud ons of their work at vari	sive literature ta collection; sent a written ited, logically ents will also

Department of Chemistry

<u>STAFF</u>

Senior Professor	N Revaprasadu, BScHons (Natal), PhD (London), Dip (Imperial College)
Professor	VSR Pullabhotla, MSc (Eng) (JNT University, India), PhD (UKZN)
Senior Lecturers	SM Mohomane, BScHons, MSc (UFS), PhD(UNIZULU)
Lecturer	SE Mavundla, PhD (UWC)
Senior Laboratory Assistants	NM Sibiya, ND (Cape Tech), BScHons (UNISA)
Laboratory Technologist	NL Khumalo, BScHons (WITS)
Lab Assistant	PW Zibane, BScHons (UNIZULU),
	SZ Ncanana, BSc Hons, MSc (Chemistry)
	(UNIZULU)
Laboratory Helpers	N Ntshangase
	SZ Mkhwanazi, BAdmin (UNIZULU)

BSc (Hons) (Chemistry) [QUALIFICATION CODE 4HON04]

This is a one-year qualification for full-time students..

The qualification consists of four theory modules and a research module:

- 4CHM501 Analytical Chemistry
- 4CHM502 Inorganic Chemistry
- 4CHM503 Organic Chemistry
- 4CHM504 Physical Chemistry
- 4CHM509 Research Project

A student may elect to substitute any one of the four theory modules with a relevant honours level module from another Department provided that the approval of both heads of Department is obtained. Students will be assigned to a research project within the on-going research work in the Department. This project will run continuously throughout the year and students may be required to give a seminar on their project. A student's results for the theory modules may be withheld by the Department until the research project and the project report have been satisfactorily completed and two bound copies of the report have been submitted.

MSc (Chemistry) [QUALIFICATION CODE 4MSC04, MODULE CODE 4CHM700]

See General Rules for Masters degrees. A dissertation on an approved topic, a seminar and an oral examination, are basic requirements

PhD (Chemistry) [4CH800] [QUALIFICATION CODE 4PHD04, MODULE CODE 4CHM800]

See General Rules for Doctoral degrees. A thesis on an approved topic, a seminar and an oral examination, are basic requirements.

The Department hosts a Centre for Mobile e-Services for Development. The centre is co-sponsored by Telkom, Huawei and Dynatech information systems. The Centre's current focus is ad-hoc Mobile Cloud-powered Grid-Based Utility infrastructure for SMME-enabling technology GUISET.

BSc (Hons) (Computer Science) [QUALIFICATION CODE 4HON05]

Admission Requirements

A BSc degree in computer science or equivalent qualification.

Curriculum

Theory modules

Students must select four theory modules from the list below:

4CPS501 Advanced Software and Distributed Computing Techniques 4CPS502 Advanced Distributed Database Techniques and AP 4CPS503 Compilation Techniques and Security- WS and SOA 4CPS504 Wireless Networks with Special focus on ad hoc networks and their simulations

One honours module from another department can be selected, with the approval of both Heads of Department.

Assessment

One, 3-hour paper shall be written at the end of the semester in which the module is taken. The Department may decide to have two, 3-hour papers written in any specific module.

Research Project

4CPS509 is a compulsory research project.

In addition to completing a report on the research, students must present a seminar on the research conducted.

Research topics can be selected from the following research areas:

Cloud Computing, Mobile Computing, Wireless ad-hoc Networks, Software-defined Networks and Electronic Warfare.

System of External Evaluation

An external examiner approved for that purpose by the Senate shall examine the written examinations and the project report. An External Examiner shall be invited to evaluate a seminar presentation on each Honour's project.

MSc (Computer Science) [4CS700]

Admission Requirements

An Honours Degree in Computer Science, Information Systems, Software Engineering or equivalent qualification subject to the approval of the head of department and the Board of the Faculty.

Departmental Research Projects

Students are expected to participate in the ongoing research projects of the Department. We are currently conducting research in the intersection of the domains of:

- Software-Defined Wireless Ad-hoc Networks
- Cloudlets for Mobile Cloud Computing.

The GUISET reference architecture has been previously developed in the Department. It relies on mobile web/cloud service technologies and standards to enable contextaware deployment of services while protecting personalisation and privacy concerns of mobile user groups. We envisaged a GUISET broker that explores all service emarket places as potential sources of pay-per-click online services. Recently, we have been looking at ensuring that the GUISET engine takes advantage of the Mobile Cloud Computing environment, which envisages a combination of architectures. At one extreme end are Data Centre based solutions, at the other end are ad hoc mobile cloud; in between will be the Cloudlet concept. We are looking to use the SDN/NFV technologies as the basis for exploring Small Data applications as well as secure and energy-efficient use cases of GUISET.

Examination

In consultation with the head of Department the degree may be awarded by dissertation ONLY.

PhD (Computer Science) [4CS800]

Prospective candidates should consult the Head of Department and familiarise themselves with the general rules. The thesis should be based on a piece of original research in the computing field worthy of publication in a reputable research journal. Please refer to Departmental Research Projects above.

Title	Advanced Software and Distributed-Computing		
	Techniques		
Code	4CPS501	Department	Computer Science
Prerequisites	None	Co-requisites	None
Aim	such as in Grid Comp and Distributed Even		d Architecture
Content	Basic Terminologies filtering mechanisms Specs of event sys Matching; Distributed Event based syst notification services. Section B – SOA and Introduction to grid co services, Backgroup procedure calls, Set service registry, implementation, SOA 4.0 grid services, usi stateful web service Grid Services Arcl Resource Frameword services, GT 4.0 co WSRF GT 4 service lifetime, index service Two papers are to be	rvice -Oriented Archite WSDL, WSDD, W AP, containers, stubs, w ing web services for gri s, Grid computing star hitecture (OGSA), W k (WSRF), programmin ntainer. 	Paper B for Section B content. Small laboratory projects are required to gain required skills in both Sections A and B of the content.		
DP Requirement	Completion of all ass	ignment and class/mini	projects.

Title	Advanced Distributed Database Techniques and Applications		
Code	4CPS502	Department	Computer Science
Prerequisites	None	Co-requisites	None
Aim	This module focuses and their applications	on enterprise database	e systems
Content	 and their applications. Section A – Distributed database systems Distributed database design; Query processing; Transaction Management; Distributed concurrency control; Distributed DBMS reliability Section B – Database Application Techniques and technologies Multimedia Databases; Database Compression; Data mining Concepts; Data mining Process; Data mining Techniques; Advanced Data mining techniques and applications: Text mining, Web mining, collaborative filtering. 		
Assessment	Paper B for Section	e written. Paper A for S B content. Small labora required skills in both So	atory projects
DP Requirement	Completion of all ass	ignment and class/mini	projects.

Title	Compilation Techniques and Security for WS and SOA		
Code	4CPS503	Department	Computer Science
Prerequisites	None	Co-requisites	None
Aim	techniques as a understanding syn Furthermore, securin	dule is to use languag computational ap tactic and semani g distributed systems ag countermeasures forms	paratus for tic models. gainst threats,
Content	part of the module. Section A – Compilation Techniques Overview Overview of the compilation process. Lexical analysis and CFGs, Syntactic Analysis and Parser Construction; Contextual analysis and runtime organization; Code generation. Section B – Security of WS and SOA Web Services Technologies, principles, architectures and standards; WS Threats, vulnerabilities and countermeasures; standards for WS security; Digital		

	for WS: Secure publ	ishing techniques; Acce	ss control for
	business processes; Emerging research trends.		
Assessment	Two papers are to be written. Paper A for Section A and		
	Paper B for Section B content. Small laboratory projects		
	are required to gain required skills in both Sections A and		
	B of the content.		
DP Requirement		signment and class/mini	
Title		with special focus	on ad hoc
	networks and their	Simulations	
Code	4CPS504	Department	Computer Science
Prerequisites	None	Co-requisites	None
Aim	The aim of this module is to teach the principles and the specialisation thereof of Wireless networks such as ad hoc, sensor and other types. The simulation and modelling of networks is also taught to prepare the student for Research.		
	Antennas and Propagation; Signal Encoding techniques; Spread Spectrum Satellite Communication; Cellular Wireless Networks; Mobile IP Bluetooth; Wireless LANs (IEEE 802.11); Ad Hoc Networks (IEEE 802.15)		
	Section B – Modelling and Simulation of Wireless Networked systems Modelling and optimization of large-scale systems in a wide variety of decision-making domains. Application domains include transportation and logistics, and telecommunications system planning. Modelling techniques covered include linear, network, discrete, and, sensitivity.		
Assessment	Two papers are to be written. Paper A for Section A and Paper B for Section B content. Small laboratory projects/assignments are required to gain required skills in both Sections A and B of the content.		
DP Requirement	Completion of all age	ignment and class/mini	nrojanta

Title	Software Defined Networking Theory and application		
Code	4CPS506	Department	Computer
		Department	Science
Prerequisites	None	Co-requisites	None
Aim	The aim of this module is to give the students a solid foundation in Software defined networking theory and prepare them to develop relevant algorithms.		
Content	Section A Overview; History and Evolution of SDN-Central Control, Programmable Networks; History and Evolution of SDN,		

	Network Virtualization; Control and Data Plane Separation-Overview, Opportunities, Challenges. Virtual Networking- What is network virtualization? Applications of network virtualization, Virtual networking in Mininet, Mininet Python API. Control Plane- Overview, Examples of SDN Controllers. Customizing the Control Plane- Switching, Firewalls. Data Planes: Software- Software Data Planes: Click, Scaling Software Data planes; Data Planes: Hardware-Making Hardware Programmable.
	Section B Programming SDNs: Northbound APIs- Motivation for Northbound APIs, Frenetic, Pyretic. Advanced SDN Programming- Composing SDNs, Resonance: Event- Driven Control, Use Cases-1- Data Centres, Internet Exchange Points; Use Cases-2- Backbone Networks, Home Networks, UZ test-bed.
Assessment	Two papers are to be written. Paper A for Section A and Paper B for Section B content. Small laboratory projects/assignments are required to gain required skills in both Sections A and B of the content.
DP Requirement	Completion of all assignment and class/mini projects.

Title	Honours Research Project		
Code	4CPS509	Department	Computer Science
Prerequisites	None	Co-requisites	None
Aim	The aim of this module is to expose students to how to conduct research. Each students learns the research method and applies one more of the methods to a real Honours level investigation.		
Content	Section A – Research Methods Lectures Instruction on What is Research, how to conduct research; Study of individual research methods, Writing of Research proposal; How to put together a Research report or Honours thesis. Section B – Preparation of Research Proposal and Execution of the Research. Student selects a topics from available research topics advertised for Honours level research; Prepares a proposal and carries out the research according to approved proposal.		
Assessment	Presentation of research project to the Department and one external examiner		
DP Requirement	Completion of reseau examiners.	rch project to the satisfa	ction of

B (Hons) (Consumer Science) [QUALIFICATION CODE 4HON06]

Admission requirements

A 3-year bachelor's degree in Home Economics / Consumer Science.

Duration of degree

One-year full-time study.

Curriculum

The approved module from the Honours syllabus in Development Studies or Tourism may be substituted for one Honours module in Consumer Sciences on approval of the respective Heads of Departments.

A specialisation module may not be offered in any given year if a suitably qualified staff member is not available.

Prospective students must contact the head of department **before the end of January**.

Modules

Compulsory Modules [4CNS508 and 4CNS509]

4CN\$508	Research methods
4CNS509	Research project and oral.

Specialisation Modules

Advanced study in three of the following topics:

Non-Formal Education and Extension
Family studies and Household Resource Management
Advanced Nutrition
Housing and Interior Design
Community Nutrition
Foods
Food Service Management Systems

Examination

Theory papers: 3-hour examinations. Research project (including an oral examination).

Title	Non-formal Education and Extension		
Code	4CNS501	Department Consum	
		Department	Sciences
Prerequisites	None	Co-requisites	None
Aim	integrated approacl development, with s	d at introducing the st h for education, tr specific applications in improving the quality ds and communities.	aining and Consumer

Content	Adult education, non-formal education and extension for community development. Framework for extension practice in SA, with applications in Consumer Sciences Analysis of development issues and the role of extension/non-formal education. Comparative practices in other countries Communication, leadership, advocacy and facilitation Assess needs and problems in community Analysis of the organizational structure and goals of extension programmes. Project planning, implementation, management, monitoring and evaluation.
Assessment	50% Formative: assignments and presentations 50% Summative: final examination(s) and project
DP Requirement	Completion of all assignments 50% Continuous assessment mark

Title	Family studies and Household Resource Management		
Code	4CNS502	Department	Consumer
		Dopartmont	Sciences
Prerequisites	None	Co-requisites	None
Aim	theoretical framework the strengths and encounter in conter dynamics and multig gender in changing	ed at introducing the ks in studying the family challenges families/ mporary society; famil generational influences; family structures; famil and livelihood generation	y/household; households ly/household the role of ly/household
		and inventiood generation	i, farmy care
Content	giving. Family/household configurations in modern society Conceptual approaches to understanding families/households and their internal dynamics - communication, decision making, conflict management, resource management, multigenerational changes on family relationships; role of women and the elderly in changing family structure Impact of HIV/AIDS on families/households and implications for living and care arrangements and livelihood generation Inter and intra household resource allocation		
Assessment	50% Formative presentations	-	nents and
DD De sudisers ent		mination(s) and project	
DP Requirement	Completion of all ass 50% Continuous asse		

Title	Advanced Nutrition			
Code	4CNS503	Department	Consumer Sciences	
Prerequisite	B Consumer Science (Nutrition)	Co-requisite	None	
Aim	To enable the student to function at nutrition policy formulation level by exposing him / her to the planning implementation, monitoring and evaluation of policies intended to maintain and /or improve the health and nutrition of people in health, disease and disasters and to act in an ethical manner.			
Content	 in RSA, includ Planning and r appropriate in nutrition and or communities public particip implementatio intervention st Nutrition servio in nutrition. HPCSA code Policy issu implementatio nutrition policie 	 act in an ethical manner. Public and community nutrition services available in RSA, including health promotion service. Planning and monitor and evaluate and document appropriate intervention strategies to address nutrition and related health issues of groups in communities and/or public and facilitation of public participation in the selection, planning implementation and evaluation of appropriate intervention strategies. Nutrition services in disaster situations and ethics in nutrition. HPCSA code of ethics for health professionals 		
Assessment		50% Formative: assignments and presentations 50% Summative: final examination(s) and project		
DP Requirement	Completion of all assignments 50 % continuous assessment mark			

Title	Housing and Interior Design		
Code	4CNS504	Department	Consumer Sciences
Prerequisites	None	Co-requisites	None
Aim	To provide relevant theoretical and practical knowledge on housing education. To explain why housing is viewed as an environment, service and a process. To develop critical thinking; analytical and problem-solving skills.		

Content	Definition of housing concepts; Theoretical perspective of housing, Human needs in housing, Decision making processes in housing, Legal and financial aspects of housing, Housing towards a sustainable development approach, Understanding the issues of informal settlement and other housing challenges, low cost housing delivery and subsidies in South Africa, Underlying policy approaches and considerations. HIV and AIDS and housing. Research in housing.
Assessment	50% Formative: assignment and presentations 50% Summative: final examination(s) and project
DP Requirement	Completion of all assignments. 50% Continuous assessment mark

Title	Community Nutrition		
Code	4CNS5 05	Department	Consumer Sciences
Prerequisite	None	Co-requisite	None
Aim	assess n monitor	utrition needs of c and evaluate pro	pply specific nutrition skills to communities, plan, implement, ogrammes aimed at helping r nutrition problems.
Content	 communities alleviate their nutrition problems. The conceptual framework for analysis of factors which lead to growth, development and survival and malnutrition. Nutrition assessment – assessing community resources, and the nutritional status of target populations. Nutrition surveillance in S.A. Household food security in rural SA. Micronutrient deficiencies in South Africa. (Vitamin A, iron iodine, and zinc status and interventions. Also incorporate the vitamin A consultative group and national food consumption surveys) Programme planning for success. Designing community nutrition programmes in SA. Infant nutrition and HIV&AIDS. Community nutrition with an international perspective Nutrition promotion (education). Primary health care. Nutrition Policy and ethics 		
Assessment	50% Formative: assignment and presentations 50%Summative: final examination(s) and project		
DP Requirement	Completion of all assignments. 50% Continuous assessment mark		

Title	Foods
	54

Code	4CNS506	Department	Consumer Sciences
Prerequisites	None	Co-requisites	None
Aim	The module is aimed at introducing the student to the theoretical aspects of food industrialization and food trade by reflecting on global trends and local attempts in South African context.		
Content	Aspects of food and nutrition policy namely; food supply (food and nutrition system in a country like South Africa; how international food trade affect food supply to populations in terms of food control, food safety; the role of food industrialization in increasing food supply – genetically modified foods, fortification, functional foods, modern preservation methods)		
Assessment	50% Formative: assignment and presentations 50% Summative: final examination(s) and project		
DP Requirement	Completion of all assignments. 50% Continuous assessment mark		

Title	Food Service Management Systems		
Code	4CNS507	Department	Consumer Sciences
Prerequisites	B Cons Sc (Hospitality & Tourism) degree	Co-requisites	None
Aim	This module aims at examining issues and challenges of the foodservice industry and outline strategies that contribute to a successful foodservice operation by focusing on a systems approach to foodservice management in the Hospitality Industry in order to improve revenue.		
Content	 Key elements for successful food service operations Menu planning, purchasing, receiving, storage and production in food service Cost control systems in food services Service delivery and increased profits Market variables such as client flow, dining times, table mix, meal duration, pricing Improving market share Current trends and challenges in food service operations 		
Assessment	50% Formative: assignment and presentations 50% Summative: final examination(s) and project		
DP Requirement	Completion of all assignments. 50% Continuous assessment mark

MCONS SCI (Consumer Sciences) [QUALIFICATION CODE: 4MSC21

[MODULE CODE 4MSC21 - Module Code: 4CNS700 - for 1st Year; Module Code: 4CNS702 - for 2nd Year; Module Code: 4CNS703 - for 3rd Year; Module Code: 4CNS704 - for 4th Year; Module Code: 4CNS705 - for 5th Year]

Admission requirements

To be admitted to M Cons Sci in Consumer Sciences a candidate shall have passed Bachelor of Science (Hons) degree in Consumer Sciences or an equivalent qualification.

Curriculum

A dissertation (4MSC21) on an approved topic. An oral examination on the contents of the dissertation may be required. Also see General Rules.

Examination

In consultation with the head of the department the degree may be awarded by dissertation only or by two written papers and a dissertation.

BSc (Hons) Geography [QUALIFICATION CODE 4HON07]

Admission Requirements

To be admitted to BSc (Hons) in Geography a candidate shall have passed Bachelor of Science degree in Geography and Environmental Studies or an equivalent qualification.

Curriculum for BSc (Hons) Geography

Five modules including the research project are to be completed.

4GES501 and the research project [4GES509] are compulsory.

A student must choose three modules after consultation with the Head of Department and will be determined by the student's undergraduate background and the availability of suitably trained staff members in a particular year.

A research project on an approved research topic to be chosen after consultation with a panel of staff members. Research is to start as soon as lectures commence.

A student must have acquired proficiency in qualitative methods and computer techniques prior to working on the research project report. A written or oral test can be required to satisfy the Head of Department in this respect.

Students who did not do GIS at undergraduate level should take undergraduate level GIS (4HYD222) concurrently with their Honours modules. A student must obtain at least 50% in GIS, otherwise they will have to repeat it before an Honours degree is confirmed complete.

History, Philosophy and Methodology of Geography
Applied Climatology
Environmental Management
Geomorphology
Research Project (to be submitted by the end of November).

One module may be selected from the following with approval of both Heads of Department:

4HYD504	Water Resources Management
4BOT501	Terrestrial Plant Ecology
4ZOL501	Population Dynamics and Aquatic Production
4ZOL502	Advanced Freshwater Ecology
4ZOL503	Advanced Estuarine Ecology
4MCB505	Environmental and Industrial Microbiology

MSc (Geography) [QUALIFICATION CODE 4MSC07, MODULE CODE 4GES700]

Admission requirements

To be admitted to MSc in Geography a candidate shall have passed Bachelor of Science (Hons) degree in Geography and Environmental studies or an equivalent qualification.

Curriculum

A dissertation (4GES700) on an approved topic. An oral examination on the contents of the dissertation may be required. Also see General Rules.

PhD (Geography) Science [QUALIFICATION CODE 4PHD07, MODULE CODE 4GES800]

A thesis (4GES800) on an approved topic. An oral examination on the contents of the thesis may be required. Also see General Rules and consult with the Head of the Department.

Title	History Phi	losophy and Meth	nodology of Geography
Code			Geography and
oode	4GES501	ES501 Department	Environmental Studies
Prerequisites	None	Co-requisites	None
Aim			
	The module is intended to provide students with background knowledge about the history and philosophical thought of geography. The history of geography will focus on the development of geography through the ages. The module will give an insight into the philosophy of the subject. The module will expose the students to the methodology of the discipline.		
Content	The module will cover the following topics: Ancient geography, as well as the German and French schools of Geography A history of the development of specific branches of the discipline. The contribution of prominent scholars to the field of geography The meaning and development of concepts such as dualism, determinism, environmental perception and regionalism. The four traditions of geography The use of models and theories in geography The quantitative and scientific paradigms in geography. The emergence of modern philosophy or paradigms in geography: positivism and phenomenology. The emergence of post-modernism in geography. The study of the following paradigms: Humanistic, Welfare, Behavioural, Radical and Feminist Geography. The value of geographic knowledge in the contemporary world. Development of Geography and geographic thought in		
Assessment	South Africa. Assignments		s and final examination
DP Requirement			and 100% attendance.
	Completion		

Title	Applied Climatology		
Code	4GES502	Department	Geography and Environmental Studies
Prerequisites	4GES341 or 4GES222	Co-requisites	None
Aim	This module serves as an introduction to the field of Applied Climatology. Climate penetrates into many facets of today's world, and will continue to do so in the future. We will investigate the many faces of Applied Climatology, both from physical and cultural		

Content	perspectives. Practical applications of Atmospheric Science and Climatology to weather-sensitive sectors are explored extensively throughout the module. The Applied Climatology Module is designed for the advanced student with a sound background of Atmospheric Science and/or related disciplines. Atmospheric and Oceanographic Data; The Climate
Content	Atmospheric and Oceanographic Data, The Climate System: controls on climate; The tropics and subtropics; Tropical Cyclones of the SW Indian Ocean; The subtropical ridge and attendant westerly waves; Subtropical deserts; Spatial and temporal patterns of climate variability; The mean climate of southern Africa; Ocean currents and ocean- atmosphere interactions; The El Nino Southern Oscillation; Climate monitoring and prediction; Climate Change; Remote sensing of the earth- ocean-atmosphere system; Weather, Climate and Society; Climate Impacts on food systems, water resources, human health and the environment.
Assessment	Practical exercises, Homework, Project, Mid-term tests and Final Exam
DP Requirement	30% Continuous Assessment Mark and 80% Attendance of theory and practical classes

BScHons) (Human Movement Science (QUALIFICATION CODES 4HON12 **BSc Hons Human Movement Science (Biokinetics)**

Students are required to do and pass all seven modules according to the fields of specialization as outlined below with a sub minimum of 50%. The total credit value of this year long qualification is 120 credits at NQF level 8.

The specialization options in any year will depend of the availability of staff as well as on student interest.

All students will be required to do internship hours as determined by the Health Profession Council of South Africa.

STUDENTS MAY SPECIALISE IN EITHER BIOKINETICS OR ADAPTED PHYSICAL ACTIVITY SPECIALISATION IN BIOKINETICS (4HON 12)

Students specializing in Rickingtics must register for the following modules:

Students specia	ilizing in Blokinetics must register for the following m
4BSS501	Health Promotion
4BSS502	Exercise Physiology
4BSS503	Biomechanics and Human Motor Behaviour
4BSS504	Professional Internship
4BSS505	Management of Orthopedic Injuries and Conditions
4BSS506	Management of Chronic Diseases and Disabilities
4BSS509	Research Methodology and Project
	6, ,

NOTE:

A limited number of students are selected for specialization in Biokinetics. These students register with the Professional Register for Biokinetics of the Health Professions Council of South Africa. Students specializing in Biokinetics are required to do simultaneous internship in the Department where they study as well as a further year at an accredited institution before they can register as a Biokineticist. Students are themselves responsible for find a position for the second year of internship.

MSc (Human Movement Science) [QUALIFICATION CODE 4MSC12, MODULE CODE 4BSS700]

Admission requirements

An Honours Bachelor's degree in Human Movement Science or related fields (Sport Science, Kinderkinetics/Biokinetics) with an average final mark of at least 60%.

Duration of Degree

A minimum of one year.

Examination

A dissertation on an approved topic.

PhD (Human Movement Science) [QUALIFICATION CODE 4PHD13, MODULE CODE 4BSS800]

Admission requirements

Admission shall be subject to the approval by the Faculty Board of Science and Agriculture on the recommendation of the Head of Department.

Duration of Degree

A minimum of two years.

Examination

A thesis on an approved topic.

Title	Health Promotion		
Code	4BSS 501	Department	Biokinetics & Sport Science

Hydrological Research Unit Acting Director

Senior Technician

Laboratory Assistant

V Elumalai, MSc (Madras), PhD (Anna) Pr. Sci. Nat.

BSc (Hons) (Hydrology) [QUALIFICATION CODE 4HON08]

Admission

The student must hold a B.Sc. Degree with Hydrology as a major or hold a B.Sc. Degree in a field within the Earth Sciences which must contain a significant hydrological component. The Head of Department will assess such a degree and assess if it is adequate for entry to the B.Sc. honours degree.

Curriculum

The degree programme consists of advanced lectures, seminars, assignments and practical work in four specialised fields and a research project.

If a student has not passed Geographic Information Systems (4HYD222) or an acceptable equivalent, then the student must register for this module concurrently with their honours registration. This module must be passed before the degree may be awarded.

Theory Modules (20 credits, NQF level 8)

The student must register for four theory modules, at least three of which must be offered by the Department of Hydrology. The fourth module may be selected from the list of hydrology modules or it may be selected from a related discipline in which the student has the necessary grounding. Students must consult with the Head of Department before selecting modules since all modules may not be offered in any given year.

Management	nyarological modelling		
4HYD505	Hydroinformatics	4HYD506	Disaster Management

Research Project (40 credits, NQF level 8)

The student must conduct a Hydrological Research Project (4HYD509), which will form the basis of a junior dissertation. The project must be defined in consultation with the Head of Department. Research is to start as soon as lectures commence and regular reports must be submitted to the supervisor. A formal proposal must be submitted, presented and accepted before the start of April.

Title	Disaster Management		
Code	4HYD506	Department	Hydrology
Prerequisites	NONE	Co-requisites	
Aim	This module is designed to introduce the subject of disaster management (DM) to Hydrological students who in future will form part of disaster management teams, government, NGOs, and donors. The module is designed to increase the student's awareness of the nature and management of disasters. This should lead to better performance in disaster preparedness and shape them to begin to see mitigation of disasters as a component of development, and disasters as opportunities to further development goals. The overall objectives of this training module aims to create interest in disaster management stimulate motivation relate the learning to their values and attitudes about disaster management		
Content	Theory: Introduction to DM; Concepts and terms in DM; Natural Disaster Assistance and Refugee Operations; Tools and Methods of DM; Technologies of DM Presentations: Drought and famine; Disaster Preparedness; Disaster Assessment; Disaster Mitigation; Vulnerability and Risk Assessment; Rehabilitation and Reconstruction; Building capacities for Risk Reduction; Disasters and Development; Exercises: Slope Processes; Earthquakes; Volcanoes and earthquakes

BSc (Hons) (Applied Mathematics) [QUALIFICATION CODE 4HON01]

Admission

In order to be admitted to the qualification, a student shall have obtained a BSc degree majoring in Applied Mathematics or its equivalent with an average of 60% for the third year modules in Applied Mathematics. The Faculty Board may admit a student on special recommendation of the Head of Department if a student does not meet these criteria. Papers offered in a particular year depend upon the availability of staff and the discretion of the Head.

Remarks

Third year mathematics modules are strongly recommended to students enrolling for this module.

The module can be completed over two years in such a way that half of the work is done in each year.

The head of the department may decide which modules are presented in any given year or semester.

Projects are chosen subject to approval by the head of the department.

Up to 2 approved modules may be taken from the Honours syllabi from physics, mathematics, computer science or statistics subject to approval by the heads of departments concerned.

Theory modules

Four theory modules selected from, inter alia, the following:

- 4AMT501 General Relativity
- 4AMT502 Relativistic Cosmology
- 4AMT503 Differential Geometry
- 4AMT504 Numerical Analysis

4AMT505	Continuum Mechanics
4AMT506	Optimisation

Research project

A research project, 4AMT509, is a compulsory part of the honours studies. The project must be defined in consultation with the Head of Department. Research is to start as soon as lectures commence and regular reports must be submitted to the supervisor. A formal proposal must be submitted, presented and accepted before the start of April.

MSc (Applied Mathematics) [QUALIFICATION CODE 4MSC01, MODULE CODE 4AMT700]

Admission requirements

An honours degree in Applied Mathematics or equivalent qualification subject to the approval of the head of department and the Board of the Faculty of Science.

Examination

In consultation with the head of the department the degree may be awarded by dissertation only or by two written papers and a dissertation. The written papers, if required, will be written either in June or in November, depending upon the student's background and at the discretion of the head of the department. For further information, consult the general rules.

BSc (Hons) (Mathematics) [QUALIFICATION CODE 4HON09]

Admission

In order to be admitted to the qualification, a student shall have obtained a BSc Mathematics degree or its equivalent with an average of 60% for the third year modules in Mathematics. The Faculty Board may admit a student on special recommendation of the Head of Department if a student does not meet this criteria.

Remarks

The qualification can be completed over two years in such a way that half of the work is done in each year.

The head of the department may decide which modules are presented in any given year or semester.

Projects are chosen subject to approval by the head of the department.

Up to 2 approved modules may be taken from the Honours syllabi from physics, applied mathematics, computer science or statistics subject to approval by the heads of departments concerned.

Theory modules

Four modules selected from, inter alia, the following:

- 4MTH501 Measure theory
- 4MTH502 Algebra
- 4MTH503 Differential equations
- 4MTH504 Numerical analysis
- 4MTH505 Topology

4MTH506 Functional Analysis

Research project

A research project, 4MTH509, is a compulsory part of the honours studies. The project must be defined in consultation with the Head of Department. Research is to start as soon as lectures commence and regular reports must be submitted to the supervisor. A formal proposal must be submitted, presented and accepted before the start of April.

BSc (Hons) (Statistics) [QUALIFICATION CODE 4HON14]

Admission

The students who have obtained a BSc degree majoring in Statistics or its equivalent with an average of 60% for the third year modules in Statistics will be admitted to this programme. The Faculty Board of Science and Agriculture may admit a student based on the special recommendations of the HOD if the student does not meet the above criteria. For admission via RPL learners will be required to demonstrate suitability either through work experience and/or other prior learning that has taken place. The institution makes provision for RPL intake, in line with the policies of the institution. The University RPL policy shall apply.

Remarks

The qualification can be completed over two years in such a way that half of the work is done in each year. The head of the department may decide which modules are presented in any given year or semester. Projects are chosen subject to approval by the head of the department. Up to 2 approved modules may be taken from the Honours syllabi from physics, applied mathematics, computer science or mathematics subject to approval by the heads of departments concerned.

Theory modules

Four modules selected from, inter alia, the following:

- 4STT501 Categorical Data Analysis
- 4STT502 Time Series Analysis
- 4STT503 Multivariate Analysis
- 4STT504 Correspondence Analysis and Biplots
- 4STT505 Stochastic Processes
- 4STT506 Probability Theory

Research project

A research project, 4STT509, is a compulsory part of the honours studies. The project must be defined in consultation with the Head of Department. Research is to start as soon as lectures commence and regular reports must be submitted to the supervisor. A formal proposal must be submitted, presented and accepted before

PhD (Mathematics) [4MTH800] [QUALIFICATION CODE 4PHD09, MODULE CODE 4MTH800]

Prospective candidates should consult the Head of Department and familiarise themselves with the general rules. The thesis will be based on a piece of original

research in some branch of Mathematics, worthy of publication in a reputable research journal.

Applied Mathematics

Title	General Relativity		
Code	4AMT501	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim	This module covers the basic ideas of general relativity.		
Content	Tensor calculus, Field equations in free space, Schwarzschild solution, Black holes, Gravitational waves, Equations for nonempty space, conservational laws & variational principles		
Assessment	50% CAM, 50% Final examination		
DP Requirement	80% attendance at l	ectures & tutorials, 40%	6 CAM

Title	Relativistic Cosmology			
Code	4AMT502	Department	Mathematical	
			Sciences	
Prerequisites	4AMT501 Co-requisites None			
Aim	Study of the basic principles of relativistic cosmology			
Content	Kinematics, conservation equations, field equations &			
	models, observations, causal properties & horizons.			
Assessment	50% CAM, 50% Final examination			
DP Requirement	80% attendance at I	ectures & tutorials, 40%	6 CAM	

Title	Differential Geome	Differential Geometry		
Code	4AMT503	Department	Mathematical	
			Sciences	
Prerequisites	None	Co-requisites	None	
Aim	This module is designed to give the student a survey of geometry and its applications. It will introduce differential geometry and its applications and will expose the student to the representation of geometric concepts using MATHEMATICA			
Content	Introduction to classical geometry: Euclidean, Non Euclidean and projective geometry, Differential manifolds, Differential forms, Local and Global theory of curves and surfaces, Minimal surfaces, Tubes, Applications.			
Assessment	50% CAM, 50% Final examination			
DP Requirement	80% attendance at l	ectures & tutorials, 40%	6 CAM	

Title	Numerical Methods		
Code	4AMT504	Department	Mathematical Sciences
Prerequisites	None	Co-requisites	None

Aim	This module introduces advanced topics in numerical methods and numerical methods for solving partial differential equations.
Content	Fast Fourier transform. Spectral methods. Numerical solutions to partial differential equations. Parallel algorithms.
Assessment	50% CAM, 50% Final examination
DP Requirement	80% attendance at lectures & tutorials, 40% CAM

Title	Continuum Mechanics		
Code	4AMT505	Department	Mathematic
			al Sciences
Prerequisites	None	Co-requisites	None
Aim	Continuum mechanics encompasses the fields of Hydrodynamics, Acoustics. Aeronautics and Elasticity theory. The aim of this module is to introduce hydrodynamics and acoustics as an example of the methodology of Continuum mechanics.		
Content	Kinematics and deformation, Derivation of the Navier– Stokes equations, Ideal inviscid flows, Rotating fluids, Compressible fluids, Acoustic applications, Computational fluid dynamics, Application in aeronautics		
Assessment	50% CAM, 50% Final examination		
DP Requirement	80% attendance at	ectures & tutorials, 40%	6 CAM

Title	Optimization		
Code	4AMT506	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim		student with a kn theory and tools of op optimal control.	U
Content	Equality constraints constraints and the l saddle point theorem One-dimensional se unconstrained optin	fficient conditions for and Lagrange multipl Kuhn-Tucker conditions ins to the solutions of the arch techniques. Gradie nization. Non-linear co Pontryagin's Maximu Maximum Principle	iers. Inequality a. Application of e dual problem. ent methods for ontrol systems,
Assessment	50% Continuous ass 50% Exam mark	sessment mark	
DP Requirement	80% attendance, 40	% Continuous assessm	nent mark

Title	Research Project		
Code	4AMT509	Department	Mathematical Sciences

Prerequisites	None	Co-requisites	4 Hons
			modules
Aim	Student to carry out a minor research project under supervision of a staff member		
Content	To be decided upon in consultation with the student and department		
Assessment	50% seminar, 50% written project		
DP Requirement	N/A		

Mathematics

Title	Measure Theory		
Code	4MTH501	Department	Mathematical
		-	Sciences
Prerequisites	4MTH321	Co-requisites	None
Aim	To provide students	with a solid foundation	in measure
	theory.		
Content	Differentiation and absolute continuity, Abstract measure		
	and integration, Measure, Outer measure, Product		
	measure, Measurable functions,		
Assessment	50% Continuous assessment mark		
	50% Exam mark		
DP Requirement			

Title	Algebra		
Code	4MTH502	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim	The objective of this module is to provide students with as much depth and comprehension as possible in their study of abstract algebra and linear algebra.		
Content	Groups and representations, Vector Spaces and modules, Rings of polynomials, Factorizations of polynomials over a field, Euclidean rings, Field extensions and Galois Theory.		
Assessment			
DP Requirement	Satisfactory complet	ion of all assignmen	ts

Title	Differential Equation	ons	
Code	4MTH503	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim	This module introduces advanced topics in differential		
	equations, especially partial differential equations.		
Content	Partial differential equations. Green's function. Fourier and		
	Laplace transforms	s. Examples of non	linear PDE's.
	Bifurcation theory.		

Assessment	50% CAM, 50% Final examination
DP Requirement	80% attendance at lectures & tutorials, 40% CAM

Title	Numerical Methods	5	
Code	4MTH504	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim	This module introduces advanced topics in numerical methods and numerical methods for solving partial differential equations.		
Content		form. Spectral metho al differential equat	
Assessment	50% CAM, 50% Fina	al examination	
DP Requirement	80% attendance at le	ectures & tutorials, 40%	6 CAM

Title	Topology		
Code	4MTH 505	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	None
Aim	reaching applicat topological ques applications natur be of such pre superficially diffe	all branches of anal- tions, topological meth- tions asked. Such rally requires that the c cision that the com- rent questions may b- sic ideas needed for a	nods are used and a wide range of onceptual structure mon core of the e recognized. This
Content	Theorem, Separ Extention Theor Compactification	Compactness, Produc ation axioms, Urysoh rem, Metrizable spa uous Assessment Mar	nn Lemma, Tietzs aces, Stone-Cech
	Exam Mark		
DP Requirement	80% of Attendance	e and 40% Continuous	s Assessment Mark

Title	Functional Analys	sis	
Code	4MTH506	Department	Mathematical
			Sciences
Prerequisites	4MTH321	Co-requisites	None
Aim	This module aims to explore the consequences of equipping a vector space with a compatible metric, and show how this leads to a natural setting for many problems in analysis.		
Content	Banach spaces, functionals, Hilber	letric spaces, Norm Subspaces, Linea t spaces, The Hahn f linear operators,	r operators and -Banach theorem,

	space orthono		distributions, sets.	Basics	of	projections	and
Assessment	50% Continuous assessment mark						
	50% Exam mark						
DP Requirement	80% attendance, 40% Continuous assessment mark						

Title	Research Project		
Code	4MTH509	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	4 Hons modules
Aim	Student to carry supervision of a sta	out a minor resea	rch project under
Content	To be decided up department	on in consultation wit	h the student and
Assessment	50% seminar, 50%	written project	
DP Requirement	N/A		

Statistics

Title	Categorical Data A	nalysis	
Code	4STT501	Department	Mathematical Sciences
Prerequisites	Experimental Design, Linear Models	Co-requisites	None
Aim	This module is desig categorical data.	ned to teach studer	nts how to analyse
Content	Two-way contingent tables; Three-way tables; Generalised model, Negative Multicategory Logit Models involving da models: Analysis representation; P Computing using state each of the above-m	contingency table d Linear model: Lo Binomial Reg model; Ordinal Reg ta on the ordinal s of data using ractical computin tistical software an	lets: Analysis of ogistic Regression gression model; esponse models: scale; Log-linear g the log-linear ng applications: d real live data for
Assessment	50% CAM, 50% Fina		
DP Requirement	80% attendance at le	ectures & tutorials,	40% CAM

Title	Time Series Analysis		
Code	4STT502	Department	Mathematical
			Sciences
Prerequisites	Random	Co-requisites	None
	Processes, Time		
	Series		
	(undergraduate)		

Aim	The aim of this module is to introduce a variety of statistical models for time series, cover the main methods for analysis and give practical experience in fitting such models.
Content	ARMA and Arima models: Analysis of ARMA and Arima models using the Box-Jenkins approach; Seasonal time series models: Analysis of seasonal data using SARMA models, Exponential smoothing models, How to fit the exponential smoothing model and obtain forecast from such model, ARMA and ARIMA forecasting, How to obtain forecasts from the fitted model, Intervention analysis, How to analyse data that are affected by some external intervention, Transfer function models, Models involving analysis of two-time series, Introduction to ARCH and GARCH model, Models that model variation, Practical computing applications, Computing using statistical software and real live data for each of the abovementioned techniques.
Assessment	50% CAM, 50% Final examination
DP Requirement	80% attendance at lectures & tutorials, 40% CAM

Title	Multivariate Analys	is	
Code	4STT503	Department	Mathematical Sciences
Prerequisites	Linear Algebra, Linear Models	Co-requisites	None
Aim	ideas and their justify analysis.	le is to introduce stude ying theories of multiva	riate statistical
Content	practical application squared for multivari multivariate repeate analysis: How to ic Multivariate analy procedure for comp groups; Principal data involving correlated number of unobserved, correlated number of unobserve Analysis: To group objects in the same than to those in of Analysis: A metho covariance matrices	Il distribution: Form, ; Multivariate t-test ate data; Profile analy- ed measures data; dentify two or more gra- visis of Variance baring multivariate me Component Analysis ated variables into a se Analysis: Describe va- variables in terms of a ved variables called fa- bar of objects in s- group are more similar ther groups; Canoni d to extract informat ; Practical computin atistical software and entioned.	 Hotelling's t- tysis: Analysis of Discriminant oups from data; (MANOVA): A eans of several s: Transforming t of uncorrelated ariability among potentially lower actors; Cluster such a way that ar to each other cal Correlation tion from cross- g applications:

Assessment	50% CAM, 50% Final examination
DP Requirement	80% attendance at lectures & tutorials, 40% CAM

Title	Correspondence A	nalysis and Biplots	
Code	4STT504	Department	Mathematical Sciences
Prerequisites	Experimental Design, Linear Models	Co-requisites	Multivariate Analysis
Aim	Correspondence Ana applications in Statis		s practical
Content	Correspondence Al Analysis, Theory o Special topics (Stat Additional constraint Computing aspects software; Biplots practice, Singular Va geometric interpret Regression ratio biplots, Discr applications and Interpret	Analysis: Geometralysis, Theory of C f Multiple Correspond bility, Re-weighting, Ho s, Missing data, Symm of practical applica : Principal componer alue Decomposition (S ation, Vector geome , Generalized linear mo riminant Analysis bip erpretation of biplots e Aultidimensional scaling	Correspondence dence Analysis, presehoe Effect, netric Matrices), ations using R hts theory and VD), theory and try of biplots, bodel biplots, Log lots, Computer e.g. using the R

DP Requirement		ectures & tutorials, 40%	CAM

Title	Stochastic Process	ses	
Code	4STT505	Department	Mathematical Sciences
Prerequisites	Random Processes, Applied Mathematical Methods	Co-requisites	Multivariate Analysis
Aim	The aim of this module is to study the basic theory of stochastic processes in discrete and continuous time. We use mathematical techniques to explore the behaviour of these processes.		
Content	term probability dist using Markov chains process: Poisson Kolmogorov differer stochastic mode	finition and basic prop tribution of a Markov of s; Time-homogeneou process and its bantial equations; Basi Iling: Classification ng, estimating and vali	chain, Modelling is Markov jump asic properties, c principles of of stochastic

	Simulation of a stochastic model and its applications; Brownian motion: Definition and basic properties, Stochastic differential equations, The Ito integral and Ito		
	formula, Diffusion and mean testing processes, The solution		
	of the stochastic differential equation for the geometric		
	Brownian motion, Ohrnstein-Uhlenbeck process.		
Assessment	50% CAM, 50% Final examination		
DP Requirement	80% attendance at lectures & tutorials, 40% CAM		

Title	Probability Theory		
Code	4STT506	Department	Mathematical
			Sciences
Prerequisites	Real Analysis	Co-requisites	None
Aim		ile is to provide student lity theory and advance	
Content	Probability Spaces, Independence, Laws of Large Numbers, Characteristics Functions, Central Limit Theorems, Introduction to Stochastic Calculus.		
Assessment	50% CAM, 50% Final examination		
DP Requirement	80% attendance at le	ectures & tutorials, 40%	CAM

Title	Research Project		
Code	4STT509	Department	Mathematical
			Sciences
Prerequisites	None	Co-requisites	4 Hons
			modules
Aim	The aim of this module is to develop a variety of research methods, skills and expertise in conducting a research project.		
Content	Students will be given an opportunity to select a research project in the area of mathematical statistics, applied statistics, time series analysis, statistical quality control, machine learning and data mining, probability theory, stochastic process and statistical inference.		
Assessment	50% seminar, 50%	written project	
DP Requirement	N/A

Master Degree in Nursing Science (M Nurs) [QUALIFICATION CODE 4MCR20, MODULE CODE 4NUR700 - DISSERTATION]

The purpose of this degree is to develop learners towards an integrated conceptual nursing framework and enable them to acquire expert knowledge in nursing practice and skills as researchers in nursing science.

Doctoral degree in nursing science (D Phil) [QUALIFICATION CODE 4DPH20, MODULE CODE 4NUR800]

The purpose of the doctoral degree is to enable learners to develop advanced skills as researchers in nursing science to advance nursing knowledge and enhance professional maturity and practice.

BSc (Hons) (Physics) [QUALIFICATION CODE 4HON11]

Remarks

This is a one year course for full-time students.

Prospective students will normally have completed the requirements for a B.Sc. degree in Physics or a related discipline.

The student shall register for a minimum of five courses in consultation with the Head of Department. One 3-hour paper shall be written on four of the courses and the fifth course is a project course.

The modules,

4PHY501 Mathematical and Numerical Methods of Physics 4PHY502 Advanced Quantum Mechanics

4PHY509 Project Physics

are compulsory for all students. The duration of all courses is six months except for the project course which takes one year. The Department offers two specialised streams, Solid State Physics and Nuclear Physics.

Students in the Solid-State stream must include:4PHY504Solid State Physics, Applications of Solid-State Physics

Students in the Nuclear Physics stream must include:

4PHY503 Nuclear Physics, Applications of Nuclear Physics and Radioactivity

A fifth course can be chosen from the following:

4PHY505 Electrodynamics

4PHY506 Statistical Mechanics

4PHY507 Electronics and Applications

 $\ensuremath{\text{Or}}$ an honours module selected from another Department in consultation with the Head.

MSc (Physics) [QUALIFICATION CODE 4MSC11, MODULE CODE 4PHY700]

This course consists of a dissertation on an approved topic, or of a dissertation plus coursework on theory on which examination papers will be written, as arranged with the supervisor appointed in consultation with the Head of Department. Seminars will be an integral part of the course. Prospective students will normally have completed the requirements for a BSc Honours degree in Physics or a related discipline. The course duration shall be a minimum of one year.

PhD (Physics) [QUALIFICATION CODE 4PHD11, MODULE CODE 4PHY800]

This course consists of a thesis on an approved topic as arranged with the supervisor appointed in consultation with the Head of Department. Seminars will be an integral part of the course. Prospective students will normally have completed the requirements for a MSc degree in Physics or a related discipline. The course duration shall be a minimum of two years.

	Operators; Simulators and LFSR; Finite State		
	Machines; and Timing Considerations in FPGAs.		
Assessment	Continuous assessment mark (50%, consisting of 2x 2-hr		
	tests, at least one project), 1x3-hr exam (50%).		
DP	30% Continuous Assessment Mark, 80% Attendance at		
Requirement	practicals & Project work		

Title	Project Physics			
Code	4PHY509	Department	Physics	
Prerequisites	4PHY311,		4PHY 501 , 4PHY	
-	4PHY322,	Co-requisites	502,	
Aim	The module is meant for BSc(Hons) and deals with material suitable for an experimental scientist. It prepares the student for experimental physics at Masters and doctoral level. The student is expected to skills in writing research proposals, conducting projects and experiments, be able to write understandable technical reports and to present results and proposals to an audience. Make a learner to be aware of and adhere to acceptable ethical behaviour.			
Assessment	proposals (Thesis, of proposals, Esse EXPERIMENTAL Data collection & t methods (RBS, EF Spectroscopy, XP PROJECTS: At least one project Physics. PRESENTATION: Presentation skills TECHNICAL REP How to write a tect TECHNIQUES ON Various methods of CARE OF INSTRU LABORATORY: Documentation rel research equipme in the laboratory. ETHICS: Importance of adh	ing research propo proposals to solic ential sections of a PHYSICS: echniques; At leas RDA, Channelling, S, ARPES, AFM, L ct in either Solid St ORT WRITING: hnical report I PUBLICATION V of writing a success JMENTATION AN lated to instrument nt. Common safety ering to accepted of ssment mark (10%	sals, Different types of it funds, etc.). Models proposal, t four characterisation SEM, Raman JV-VIS) ate Physics or Nuclear VRITING: sful publication. D SAFETY IN THE s and maintenance of y rules and procedures	
	writing skills, 90%		000/ Attendence at	
DP			80% Attendance at	
Requirement	practicals & Project	CT WOFK		

Department of Zoology

STAFF Associate Professor Senior Lecturer	L Vivier, MSc (UP), PhD (UNIZULU) NF Masikane, MSc (NMU), PhD (UKZN)
Lecturers	HMM Mzimela, MSc (UNIZULU), SSTD SN Mpanza, MSc (UNIZULU)
Senior Laboratory Assistants	N Nariensamy-Venkatasalu, BSc (Hons) (UNIZULU) M Mothwa, BSc Hons (Limpopo)
Senior Technician	R Seabi, BSc Hons, (Limpopo)
Administrative Assistant	NFC Mbongwa, (Office Management &
Laboratory Assistants	Technology) (DUT) M Mhlongo M Zondo

BSc (Honours) Zoology [Qualification code 4HON15]

Admission requirements

A BSc degree with a major in Zoology, or an equivalent BSc degree as approved by the Board of the Faculty.

Curriculum

The student must register for four theory modules, at least three of which must be offered by the Department of Zoology. The fourth module may be selected from a related discipline in which the student has the necessary grounding. Students must consult with both Head of Departments before selecting modules from another department.

The theory component involves four theory modules, two per semester:

4ZOL501: Population dynamics and Production 4ZOL502: Advanced Freshwater Ecology 4ZOL503: Advanced Estuarine Ecology 4ZOL504: Ecophysiology

Research Project Module 4ZOL509:

This involves a Research Project that runs throughout the year. It incorporates the development of a project proposal and the presentation and defence of the proposal in written and oral format, and the completion of a mini thesis that is defended during a seminar presented by the candidate on completion of the research project.

Assessment

Assessment for each theory module involves assignments (semester mark) and a 3hr examination (examination mark), written in June (4ZOL501 and 4ZOL502) and November (4ZOL503 and 4ZOL504).

Theory module marks will be calculated as follows: Semester mark: 50%, Examination mark: 50%

For the Research module (4ZL509), the following mark allocation applies: Project proposal (10%), Research Methodology assignments (10%), Project seminars x 2 (20%), Mini thesis (60%).

The final mark is calculated as follows: Theory modules: two thirds of the final mark; Research module: one third of final mark.

MSc (Zoology) [Qualification code 4MSC15, module code 4ZOL700]

Admission requirements:

An Honours Bachelor's degree in Zoology, OR

An Honours Bachelor's degree in another subject OR from another university as approved by Council on recommendation of Senate.

Admission shall be subject to approval by the Board of the Faculty on the recommendation of the Head of Zoology.

Curriculum / Examination

A dissertation on an approved topic.

PhD (Zoology) [Qualification code 4PHD15, module code 4ZOL800]

Admission requirements

An MSc in Zoology OR an equivalent qualification as recommended by the Head of Zoology and approved by the Board of the Faculty of Science.

Curriculum / Examination

A thesis on an approved topic.

Title	Population Dynamics and Aquatic Production		
Code	4ZOL501	Department	Zoology
Prerequisites	4ZOL 312 & 4ZOL322	Co-requisites	None
Aim	Production of natural primary producers (pl the higher trophic lev this module is to production studies of ecosystems. This mod opposite ends of t zooplankton as secon levels and fish stock trophic levels and with humans. Any product	ants and phytoplank els such as fish stor expose the studer the animal commu dule focuses on two he faunal trophic idary producers at the assessment, repre- th direct economica	kton) through to cks. The aim of nt to scientific unity of aquatic components at spectrum; the ne lower trophic esenting higher I importance to

	based on population dynamics, which therefore also forms an integral part of this module.	
Content	 Population dynamics: Definition of population dynamics. Population parameters, life tables and growth curves. Secondary Production: Reasons for secondary production estimations, basic methods to calculate secondary production for different types of populations. P/B ratios. Basics of fish stock assessment: Objectives of fish stock assessments. Data required and how they are estimated or obtained. Aspects such as, stock, cohorts, recruitment, natural and fishing mortality, catch per unit effort, maximum sustainable yield, monitoring of exploited stocks. Practical component: Secondary production calculation for an estuarine zooplankton population 	
Assessment	50% Continuous Assessment Mark (Essays, Seminars, Laboratory or Fieldwork etc.) 50% Final Assessment (Final end of module exam).	
DP Requirement	40% Continuous Assessment Mark	

Title	Advanced Freshwate	r Ecology	
Code	4ZOL502	Department	Zoology
Prerequisites	4ZOL 312 & 4ZOL322	Co-requisites	None
Aim	To provide the student theoretical and pract importance of South associated ecological Aquatic Resource Mar recent management p Aquatic Resource Man To introduce appropria biomonitoring and techniques, data interp with Freshwater Ecolog	tical aspects of th Africa's aquatic reso functioning, recent nagement in South A rotocols and manage agement in South Afri te and relevant pract assessment methor retation and report wr	e nature and burces and its advances in frica as well as ement tools for ica, ical monitoring, ds, sampling iting associated
Content	The module content Ecological principles i South Africa, the Ecol National Water Resou water supply and o management and Wa new South Africa, Pro- resources and Aquatic Ecosystem Biomonitor	n South Africa, Wate ogical Reserve in So irce Strategy, Strateg demand in South ter Management Ins otection and classific Biomonitoring (The N	er resources in bouth Africa, the jies to balance Africa, Water titutions in the cation of water

Assessment	50% Continuous Assessment Mark (Essays, Seminars, Laboratory or Fieldwork etc.) 50% Final Assessment (Final end of module exam)
DP Requirement	40% Continuous Assessment Mark

Title	Advanced Estuarine Ecology		
Code	4ZOL503	Department	Zoology
Prerequisites	4ZOL 312 & 4ZOL322	Co-requisites	None
Aim	To provide the student with an in-depth understanding of the theoretical and practical aspects of the nature and importance of estuarine ecosystems with particular reference to South Africa.		
Content			
Assessment	50% Continuous Assessment Mark (Essays, Seminars, Laboratory or Fieldwork etc.) 50% Final Assessment (Final		
	end of module exam).		
DP Requirement	40% Continuous Ass		

Title	Ecophysiology		
Code	4ZOL504	Department	Zoology
Prerequisites	4ZOL 321 & 4ZOL322	Co-requisites	None
Aim	To examine the major physiological adaptations exhibited by animals to their environment and to develop knowledge and understanding of the principles controlling the behaviour of cells and organs in response to environmental factors.		

Content	Environmental factors affecting physiological processes in animals. Respiratory physiology of aquatic invertebrates, fish, aquatic mammals and humans. How molecular substances in cells such as DNA and enzymes, and cell division are affected by external or environmental factors.
Assessment	50% Continuous Assessment Mark (Essays, Seminars, Laboratory or Fieldwork etc.) 50% Final Assessment (Final end of module exam).
DP Requirement	40% Continuous Assessment Mark

Title	Project Design & Implementation		
Code	4ZOL509	Department	Zoology
Prerequisites	4ZOL 312 & 4ZOL322	Co-requisites	
Aim	This module is designed to get the students to follow through the full research project cycle from inception to write up of research findings.		
Content	 The module will involve: Literature review of research topic Writing a research proposal Research seminar of research project Implementation of research methodology Fieldwork and data collection 6. Data analysis and writing up of the report (mini thesis) 		
Assessment	40% Continuous Assessment Mark (Project Proposal & Two Project Seminars) and 60% Final Assessment (Mini Thesis).		
DP Requirement	40% Continuous Assessment Mark.
